

Is it possible

my home value will
increase with solar?

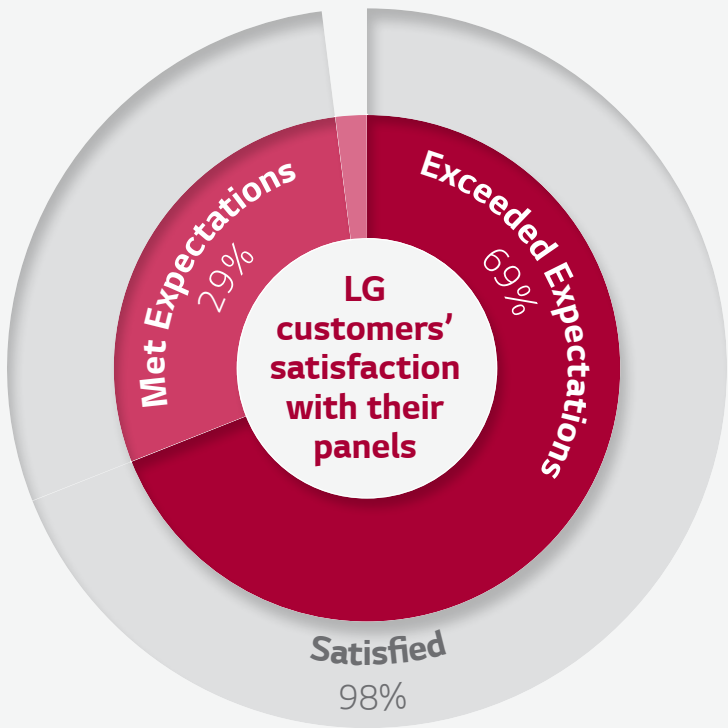

Adding solar won't just lower your bills. It will make your house more attractive to buyers, too. According to 2019 research from Zillow, homes with solar energy systems sell for 4.1% more on average than comparable homes without solar. In some markets, the increase in sale price is even greater—as high as 5.4% in New York City.

LG Solar
Power the Possibilities™

Gain more benefits than you ever expected

Owners of LG Solar energy systems are **overwhelmingly pleased with their investments.**

A Harris Insights & Analytics Research survey conducted in 2020 found nearly universal satisfaction among LG Solar homeowners. In fact, a majority said their expectations had actually been exceeded.

Get panels with proven durability

A solar energy system needs to be able to withstand **everything Mother Nature throws at it.** That's why LG Solar panels are built to perform and built to last. They're backed by a 25-year limited product, performance and labor (up to \$450*) warranty. And if you decide to sell your house, you can easily transfer the warranty to a new owner.

Partner with a brand you can trust

The brand you choose matters. LG is one of the most trusted names in the consumer electronics and appliance space, with over 70 years of experience and more than 30 years of solar panel research and development. So when you partner with LG Solar, you also gain peace of mind.
