One-year limited warranty — LG Televisions ..................... 78
CHILD SAFETY

PROPER TELEVISION PLACEMENT MATTERS

THE CONSUMER ELECTRONICS INDUSTRY CARES

- Manufacturers, retailers and the rest of the consumer electronics industry are committed to making home entertainment safe and enjoyable.
- As you enjoy your television, please note that all televisions - new and old- must be supported on proper stands or installed according to the manufacturer’s recommendations. Televisions that are inappropriately situated on dressers, bookcases, shelves, desks, speakers, chests, carts, etc., may fall over, resulting in injury.

TUNE IN TO SAFETY

- **ALWAYS** follow the manufacturer’s recommendations for the safe installation of your television.
- **ALWAYS** read and follow all instructions for proper use of your television.
- **NEVER** allow children to climb on or play on the television or the furniture on which the television is placed.
- **NEVER** place the television on furniture that can easily be used as steps, such as a chest of drawers.
- **ALWAYS** install the television where it cannot be pushed, pulled over or knocked down.
- **ALWAYS** route cords and cables connected to the television so that they cannot be tripped over, pulled or grabbed.

WALL OR CEILING MOUNT YOUR TELEVISION

- **ALWAYS** contact your retailer about professional installation if you have any doubts about your ability to safely mount your television.
- **ALWAYS** use a mount that has been recommended by the television manufacturer and has a safety certification by an independent laboratory (such as UL, CSA, ETL).
- **ALWAYS** follow all instructions supplied by the television and mount manufacturers.
- **ALWAYS** make sure that the wall or ceiling where you are mounting the television is appropriate. Some mounts are not designed to be mounted to walls and ceilings with steel studs or cinder block construction. If you are unsure, contact a professional installer.
- Televisions can be heavy. A minimum of two people is required for a wall or ceiling mount installation.

MOVING AN OLDER TELEVISION TO A NEW PLACE IN YOUR HOME

- Many new television buyers move their older CRT televisions into a secondary room after the purchase of a flat-panel television. Special care should be made in the placement of older CRT televisions.
- **ALWAYS** place your older CRT television on furniture that is sturdy and appropriate for its size and weight.
- **NEVER** place your older CRT television on a dresser where children may be tempted to use the drawers to climb.
- **ALWAYS** make sure your older CRT television does not hang over the edge of your furniture.
**Important Safety Instructions**

**California Proposition 65**
Warning: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. **Wash hands after handling.**

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean only with dry cloth.
7. Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11. Only use attachments/accessories specified by the manufacturer.
12. Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
13. Unplug this apparatus during lightning storms or when unused for long periods of time.
14. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
15. The wall plug is the disconnecting device. The plug must remain readily operable.
16. Remote control batteries should not be exposed to excessive heat such as sunshine, fire, or the like.
17. The apparatus should not be exposed to dripping or splashing, and no objects filled with liquids, such as vases, should be placed on the apparatus.
18. An apparatus with a three-prong, grounding-type plug is a Class 1 apparatus which needs to be grounded to prevent possible electric shock. Make sure that you connect the Class 1 apparatus to a grounding-type, three-prong outlet.
19. Should you choose to mount this TV to a wall or TV stand with integrated mount, **the mounting bracket must be securely attached using all four of the VESA mounting holes on the back of the TV.** Failure to attach the TV mount bracket to all four mounting holes may result in the TV falling, which could cause property damage and/or personal injury. See the documentation that came with your wall mount or TV stand for complete mounting instructions.

**WARNING**

**Electric shock hazard**
To reduce the risk of fire or electric shock, do not remove any cover or expose the device to rain or moisture. No user-serviceable parts are inside. Refer servicing to qualified service technicians.

**Lightning**
For added protection for your device receiver during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the power outlet and disconnect any antenna or cable system. This helps prevent property damage and personal injury from lightning and power line surges.

**Power lines**
An outside antenna system should not be located in the vicinity of overhead power lines or other electric light or power circuits, or where it can fall into such power lines or circuits. When installing an outside antenna system, take extreme care to keep from touching such power lines or circuits as contact with them might be fatal.
Handling the LCD panel

- Your TV’s screen is made of glass. Do not drop your TV or hit, jolt, or press hard against the LCD panel. If the screen breaks, be careful of broken glass.
- If the LCD panel is broken, make absolutely sure that you do not touch the liquid in the panel. This may cause skin inflammation.
- If the liquid gets in your mouth, immediately gargle, rinse, and consult with your doctor. Also, if the liquid gets in your eyes or touches your skin, consult with your doctor after rinsing for at least 15 minutes or longer in clean water.

Replacement parts

When replacement parts are required, make sure that the service technician uses replacement parts specified by the manufacturer that have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, personal injury, or other hazards.

Safety check

After completing any service or repair to this device, ask the service technician to perform routine safety checks to determine that your TV is in correct operating condition.

Power source

Operate your TV only from the type of power source indicated on the marking label. If you are not sure of the type of power supplied to your home, consult an electrician or your local power company.

Servicing

These servicing instructions are for use by qualified service personnel only. To reduce the risk of electric shock, do not perform any servicing other than that contained in the operating instructions unless you are qualified to do so.

CAUTION

Damage requiring service

Unplug this TV from the power outlet and refer servicing to qualified service personnel under the following conditions:

- When the power supply cord or plug is damaged or frayed.
- If liquid has been spilled or objects have fallen into your TV.
- If your TV has been exposed to rain or water.
- If your TV does not operate normally by following the operating instructions. Adjust only those controls covered by the operating instructions because incorrect adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore your TV to its normal operation.
- If your TV has been dropped or damaged in any way.
- When your TV exhibits a distinct change in performance.

Outdoor antenna grounding

If an outside antenna or cable system is connected to your TV, make sure that the antenna or cable system is grounded to provide some protection against voltage surges and built-up static charges. Article 810 of the National Electrical Code, ANSI/NFPA No. 70, provides information with respect to correct grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of grounding conductors, location of the antenna-discharge unit, connection to grounding electrodes, and requirements for the grounding electrode.

Note to CATV system installer

Article 820 of the National Electrical Code, ANSI/NFPA No. 40 provides guidance for correct grounding. Specifically, it states that the cable ground must be connected to the grounding system of the building as close to the point of cable entry as practical.

Condensation

Moisture will form on the TV if the TV is brought from cool surroundings into a warm room or if the temperature of the room rises suddenly. When this happens, the TV’s performance may be impaired. To prevent this, let the TV stand in its new surroundings for about an hour before switching it on, or make sure that the room temperature rises gradually. Condensation may also form during the summer if the TV is exposed to the breeze from an air conditioner. In such cases, change the location of the TV.

Mobile telephone warning

To avoid interference with your TV picture and sound, operating problems, or even damage, keep your cordless and cellular telephones away from the TV.
End of life directives

Your TV may contain materials that are regulated for environmental reasons. Your TV also contains materials that can be recycled and reused. To help protect the environment, contact your local authorities for information about disposal or recycling and about finding a recycler in your area before you dispose of your TV.

Non-active pixels

The LCD panel contains almost 3 million thin film transistors, which provide exceptionally sharp video quality. Occasionally, a few non-active pixels may appear on the screen as a fixed blue, green, or red point. These non-active pixels do not adversely affect the performance of your TV, and are not considered defects.
Welcome

Congratulations on the purchase of your new LG TV powered by Roku TV! Discover the joy of endless entertainment. After it's set up, you'll be able to access a world of streaming content channels that may include Netflix, YouTube, Crackle, CNET and literally thousands more. Also, your TV will receive automatic updates, enabling new content and features.

The new standard in Smart TVs

Welcome to TV like you've most likely never seen before—a home screen that you can personalize with your favorite devices and streaming channels. Choose from hundreds of thousands of streaming movies and TV episodes, plus music, sports, kids, family, international and much more. You should never run out of things to watch.

Get the most out of your new LG TV powered by Roku TV

Follow these simple steps to get the most out of your new LG TV powered by Roku TV.

1 Connect to the Internet
   • It's simple, it's easy, and it will unlock a world of entertainment. All you need is a wireless network. There are hundreds of free streaming channels, subscriptions services like Netflix and Spotify, convenient ways to rent or buy a favorite film or show with Google Play and Cineplex and more.

2 Pick your favorite streaming channels
   • Find the entertainment you love. From the latest blockbuster movies to your favorite TV shows, with tons of sports, a broad selection of music streaming channels, popular programming in a dozen international languages, 24x7 live news and so much more, your new TV has your sweet spot.

3 Personalize your home screen
   • Your TV puts your favorite broadcast TV, streaming channels, gaming console and other devices front-and-center on the home screen. No more flipping through inputs or wading through complicated menus. You can even personalize the names of each input and move tiles around so your most-often used devices and streaming channels are only a click away.

4 Search for your favorite movie, TV show, actor, or director
   • Once you're connected to the internet, you can easily search across top streaming channels by movie or TV show title, actor or director-all from one place. Search results are organized by price so you can always see the best priced option.

5 Send your personal media to the big screen
   • Send personal photos, videos, and music from your smartphone or tablet to the TV screen in just a few taps. Plus, with Netflix and YouTube apps, send movies, shows, sport highlights, and more directly to your TV.

6 Follow movies coming soon
   • Use My Feed to choose from and follow a list of upcoming movies, and then watch for alerts each time one of your followed movies becomes available or changes price.

7 Take charge with a smartphone or tablet
   • Control your TV with the included remote or from your smartphone or a tablet with the free mobile app for iOS, Android, and Windows devices. Browse channels, view My Feed, and even search with voice via free mobile app.
   • Mirror your smartphone or tablet on your TV. Share videos, photos, web pages, and more from compatible devices.

Note

Some channels require payment and/or a subscription to access content. Channel availability is subject to change and not all content is available in countries or regions where Roku products are sold.

Follow these simple steps to get the most out of your new LG TV powered by Roku TV.

1 Connect to the Internet
   • It's simple, it's easy, and it will unlock a world of entertainment. All you need is a wireless network.    • Mirror your smartphone or tablet on your TV. Share videos, photos, web pages, and more from compatible devices.

Note

Many features work with top mobile devices. Please see http://support.roku.com for device compatibility information.

For more information, see Guided Setup on page 31.
Installing the stand or wall-mount bracket

- If you want to place your TV on a table or in an entertainment center, go to Installing the stand.
- If you want to mount your TV on a wall, go to Installing a wall-mount bracket.

### Notes

- If you plan to wall-mount your TV, do not install the stand.
- Store the stand and stand screws in case you decide to use the stand in the future.

#### Installing the stand

1. Carefully place your TV face-down on a cushioned, clean surface to protect the screen.

2. Align the TV stands with the screw holes on the bottom of the TV, then secure the stands to the TV with the four provided screws.

Installing a wall-mount bracket

### Warnings

- Your TV has four VESA mounting holes on the back. If you attach a wall-mount bracket to the back of your TV, **the bracket must be securely attached, using all four holes.** If you do not use all four mounting holes, your TV may fall and cause property damage or personal injury. See the documentation that came with your wall mount for complete mounting instructions.
- Your TV is intended to be supported by a UL Listed wall mount bracket with suitable weight/load. (See Miscellaneous on page 75.)

1. Carefully place your TV face-down on a cushioned, clean surface to protect the screen.

2. If the TV stands are installed, remove the four screws that secure the stands to your TV.
3 Attach the wall-mount bracket to your TV using the mounting holes on the back of your TV. See the instructions that came with the wall-mount bracket for information about how to correctly hang your TV.

**Notes**
- The length of the wall-mount screws vary depending on the wall-mount bracket you purchased. See the instructions that came with the wall-mount bracket for screw lengths.
- The mounting holes on the back of your TV take type M6 screws.
LG TV powered by Roku TV

Your LG TV powered by Roku TV has built-in controls for adjusting basic settings and several sets of jacks for connecting devices to your TV.

This section contains information about:
- Package contents
- Front features
- Buttons
- Side jacks
- Back jacks
- TV remote control

Package contents
- 55" or 65" LED LG TV powered by Roku TV
- Remote control and batteries (2 AAA)
- TV stands (2)
- Screws (4)
- Power cord
- Quick Setup Guide
- Important Information

Buttons

The controls on your TV enable you to perform simple functions, but are not a substitute for the remote control. Your TV has seven buttons on the left edge of the screen. From top to bottom, they perform the following functions:

1. **INPUT**
   - Select among the configured TV inputs. Each press moves down one item. Also, while the Input panel is visible, the CH+ and CH– buttons move the highlight up and down. Pausing for a few moments selects the highlighted input.

2. **MUTE**
   - Mute or unmute the sound.

3. **VOL+/VOL–**
   - Press to increase or decrease the volume.

4. **CH+/CH–**
   - Go to the next or previous channel in the channel list. For more information, see Watching broadcast TV channels on page 43.
   - OR
   - Move the highlighted item up down in the current menu.

5. **(power)**
   - Press to turn your TV on or off (standby mode).
   - **Warning:** When your TV is off, power still flows through it. To completely disconnect power, unplug the power cord.

### TV remote control

#### #  Button  Description

1. **(power)**  
   - If your TV is in Standby mode, turns power on.
   - If your TV is on, puts TV in Standby mode.

2. **(back)**  
   - The action depends on what you are doing with your TV:
     - **Menu** — Goes back to previous menu or screen.
     - **Home screen tile** — Moves highlight back to the Home menu option.
     - **Watching Antenna TV or a TV input** — Returns to the screen from which the input was selected.
     - **Playing streaming content** — Stops playing stream and returns to the previous menu or screen.
     - **Browsing streaming content** — Goes to the previous level in the content tree.

3. **^ ⬆ ⬆ ⬆**  
   - Moves the highlight up one item.
   - Moves the highlight down one item.
   - Moves the highlight left, if possible (if a < hint appears).
   - When watching TV, displays your channel list.
   - When playing most streaming videos, skips backward in the video.

4. **(jump back)**  
   - When viewing antenna or cable (no box) programming, changes to the previous channel.
   - When viewing streaming content, jumps back one position in video.
   - When entering text in menus (such as searching), backspaces one letter.

5. **(sleep)**  
   - First press displays a banner showing the remaining sleep time, if any, or **Sleep timer is off**. Subsequent presses cycle among the preset sleep time intervals: **30 minutes**, **1 hour**, **1.5 hours**, **2 hours**, and **3 hours**. Once set, the Sleep timer remains in effect regardless of what you are watching.

6. **(rewind)**  
   - When playing streaming video that supports this feature:
     - First press rewinds at 1x speed.
     - Second press rewinds at 2x speed.
     - Third press rewinds at 3x speed.
     - Subsequent presses cycle through 1x, 2x, and 3x rewind speed.
   - When playing streaming audio, jumps to the previous track/selection.
   - When any menu, tile, or channel in the channel list is highlighted, jumps up one page.
   - When using a virtual keyboard, jumps to the character at the top of the current column.

7. **►► (play/pause)**  
   - When playing streaming content, alternately pauses and plays the content.

8. **(home)**  
   - Immediately returns to the Home screen menu.

9. ***(options)***  
   - Displays an Options menu, but only when the Options ⋆ hint in the upper-right corner of the screen is not dimmed. The menu you see varies depending on what you are doing with your TV.
   - Also, in most cases, pressing ⋆ while video is playing displays an Options menu over part of the screen where you can adjust various picture and sound settings.

10. **►► (fast forward)**  
    - When playing streaming video that supports this feature:
      - First press fast forwards at 1x speed.
      - Second press fast forwards at 2x speed.
      - Third press fast forwards at 3x speed.
      - Subsequent presses cycle through 1x, 2x, and 3x fast forward speed.
    - When playing streaming audio, jumps to the next track/selection.
    - When any menu, tile, or channel in the channel list is highlighted, jumps down one page.
    - When using a virtual keyboard, jumps to the character at the bottom of the current column.
### FEATURED CHANNEL SHORTCUT

What connection should I use?

Your TV has several connection types for connecting devices to your TV. For the best video quality, you should connect a device to the best available connection. Use the following tables to identify cables:

<table>
<thead>
<tr>
<th>Video quality</th>
<th>Connection type and jack</th>
<th>Cable connector</th>
</tr>
</thead>
<tbody>
<tr>
<td>Best (use this if your devices have HDMI)</td>
<td>HDMI video/audio</td>
<td><img src="image" alt="HDMI Cable" /></td>
</tr>
<tr>
<td>Good</td>
<td>AV (composite video) (requires an audio connection)</td>
<td><img src="image" alt="AV Cable" /></td>
</tr>
<tr>
<td>Good</td>
<td>Coaxial video/audio</td>
<td><img src="image" alt="Coaxial Cable" /></td>
</tr>
</tbody>
</table>

Cautions

- Check the jacks for position and type before making any connections.
- Loose connections can cause poor audio or video quality. Make sure that all connections are tight and secure.
- The external audio/video devices shown may be different from your devices. If you have questions, refer to the documentation that came with your devices.
- Always turn off your TV when connecting external devices.
Connecting a cable or satellite box

Many cable or satellite TV boxes have more than one connection type. To get the best video, you should use the best connection type available. For more information, see What connection should I use? on page 14.

You can connect your cable or satellite box using:
- HDMI (best)
- AV (composite video) (good)
- Coaxial (good)

**HDMI (best)**

1. Make sure that your TV's power cord is unplugged and all connected devices are turned off.
2. Connect the incoming cable from the cable wall jack to the cable-in jack on the cable or satellite box.
3. Connect an HDMI cable (not provided) to an HDMI jack on the side or back of your TV and to the HDMI OUT jack on the cable or satellite box.
4. Plug your TV's power cord into a power outlet, turn on your TV, then turn on the cable or satellite box.
5. On the Home screen, press \( \swarrow, \searrow, \swarrow, \or \searrow \) to highlight the **HDMI 1**, **HDMI 2**, or **HDMI 3** tile, then press **OK**.

**Note**
An HDMI cable carries both audio and video. You do not need to use any audio cables.
AV (composite video) (good)

1. Make sure that your TV's power cord is unplugged and all connected devices are turned off.
2. Connect the incoming cable from the cable wall jack to the cable-in jack on the cable or satellite box.
3. Connect an AV cable (not provided) to the VIDEO jack and LEFT and RIGHT (audio) jacks on the back of your TV and to the AV and audio out jacks on the cable or satellite box.

Note
When you connect the audio using the LEFT and RIGHT (audio) jacks, the audio output is analog.

4. Plug your TV's power cord into a power outlet, turn on your TV, then turn on the cable or satellite box.
5. On the Home screen, press ▲, ▼, ◀ or ▶ to highlight the AV tile, then press OK.
Coaxial (good)

1. Make sure that your TV’s power cord is unplugged and all connected devices are turned off.
2. Connect the incoming cable from the cable wall jack to the cable-in jack on the cable or satellite box.
3. Connect a coaxial cable (not provided) to the ANTENNA / CABLE jack on the back of your TV and to the coaxial out jack on the cable or satellite box.
4. Plug your TV’s power cord into a power outlet, turn on your TV, then turn on the cable or satellite box.
5. Set up the TV tuner to watch broadcast TV. See Setting up Antenna TV on page 40.
6. On the Home screen, press ▲, ▼, ◀, or ▶ to highlight the Antenna TV tile, then press OK.

Notes
- Use a coaxial cable to eliminate interference and noise from radio waves.
- Do not bundle the coaxial cable with the power cord or other cables.
Connecting an antenna or cable TV (no box)

1. Make sure that your TV’s power cord is unplugged and all connected devices are turned off.
2. Connect a coaxial cable (not provided) to the **ANTENNA / CABLE** jack on the back of your TV and to the antenna or cable TV wall jack.
3. Plug your TV’s power cord into a power outlet, then turn on your TV.
4. On the Home menu, press ▲▼< or > the highlight the tile for **Antenna TV**, then press **OK**.
5. Set up the TV tuner to watch broadcast TV. See Setting up Antenna TV on page 40.
6. On the Home screen, press ▲▼< or > to highlight the **Antenna TV** tile, then press **OK**.

**Notes**
- Use a coaxial cable to eliminate interference and noise from radio waves.
- Do not bundle the coaxial cable with the power cord or other cables.
- If the antenna is not installed correctly, contact qualified service personnel to correct the problem.
- If the signal level for a channel is weak, the picture may be distorted. Adjust the antenna or use a highly directional outdoor or set-top antenna with a built-in amplifier.
- If the picture quality is good on some channels and poor on others, the problem may be caused by a poor or weak signal from the broadcaster or cable TV provider.
- If you connect to cable TV without a set-top box and experience poor picture quality, you may need to install a set-top box to improve signal reception and picture quality. Contact your cable TV provider about upgrading to a set-top box.
- Many high-definition (HD) channels upscale standard-definition (SD) content. The picture displayed on your TV is still displayed as SD, thus the picture quality will not be as clear or crisp as it would be if the content was originally recorded in HD.
Connecting a DVD or Blu-ray player

Many DVD or Blu-ray players have more than one connection type. To get the best video, you should use the best connection type available. For more information, see What connection should I use? on page 14. You can connect a DVD or Blu-ray player using:

- **HDMI (best)**
- **AV (composite video) (good)**

**HDMI (best)**

1. Make sure that your TV's power cord is unplugged and the DVD or Blu-ray player is turned off.
2. Connect an HDMI cable (not provided) to an HDMI jack on the side or back of your TV and to the HDMI OUT jack on the DVD or Blu-ray player.
3. Plug your TV's power cord into a power outlet, then turn on your TV and DVD or Blu-ray player.
4. On the Home screen, press ▲ ▼ < or > to highlight the HDMI 1, HDMI 2, or HDMI 3 tile, then press OK.

**Note**

An HDMI cable carries both audio and video. You do not need to use any audio cables.
**AV (composite video) (good)**

<table>
<thead>
<tr>
<th>Note</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cables are often color-coded to match color-coded jacks.</td>
</tr>
</tbody>
</table>

1. Make sure that your TV's power cord is unplugged and the DVD or Blu-ray player is turned off.
2. Connect an AV cable (not provided) to the **VIDEO** jack and **LEFT** and **RIGHT** (audio) jacks on the back of your TV and to the **AV OUT** jacks on the DVD or Blu-ray player.

<table>
<thead>
<tr>
<th>Note</th>
</tr>
</thead>
<tbody>
<tr>
<td>When you connect the audio using the <strong>LEFT</strong> and <strong>RIGHT</strong> (audio) jacks, the audio output is analog.</td>
</tr>
</tbody>
</table>

3. Plug your TV's power cord into a power outlet, then turn on your TV and DVD or Blu-ray player.
4. On the Home screen, press ▲ ▼ ◀ or ▶ to highlight the **AV** tile, then press **OK**.

---

For more information, visit www.lg.com/us.
Connecting a game console

Many game consoles have more than one connection type. To get the best video, you should use the best connection type available. For more information, see What connection should I use? on page 14.

You can connect a game console using:
• HDMI (best)
• AV (composite video) (good)

HDMI (best)

1 Make sure that your TV's power cord is unplugged and the game console is turned off.
2 Connect an HDMI cable (not provided) to an HDMI jack on the side or back of your TV and to the HDMI OUT jack on the game console.
3 Plug your TV's power cord into a power outlet, then turn on your TV and the game console.
4 On the Home screen, press \ or > to highlight the HDMI 1, HDMI 2, or HDMI 3 tile, then press OK.

Note
An HDMI cable carries both audio and video. You do not need to use any audio cables.
AV (composite video) (good)

Note
Cables are often color-coded to match color-coded jacks.

1 Make sure that your TV’s power cord is unplugged and the game console is turned off.
2 Connect the game console’s AV cable (not provided) to the VIDEO jack and LEFT and RIGHT (audio) jacks on the back of your TV and to the composite jack(s) on the game console.

Note
• Most game consoles come with a special AV cable. See the documentation that came with your game console or check the manufacturer’s Web site.
• When you connect the audio using the LEFT and RIGHT (audio) jacks, the audio output is analog.

3 Plug your TV’s power cord into a power outlet, then turn on your TV and the game console.
4 On the Home screen, press ▲ ▼ < or > to highlight the AV tile, then press OK.
Connecting a computer

You can use an HDMI jack on your TV to connect to a computer.

1. Make sure that your TV’s power cord is unplugged and the computer is turned off.
2. Connect an HDMI cable (not provided) to an HDMI jack on the side or back of your TV and to the HDMI OUT jack on the computer.
3. Plug your TV's power cord into a power outlet, then turn on your TV and the computer.
4. On the Home screen, press ▲, ▼, < or > to highlight the HDMI 1, HDMI 2, or HDMI 3 tile, then press OK.
5. Adjust the display properties on the computer, if necessary.
Connecting a USB flash drive

You can use the **USB IN** jack on your TV to view photos and videos and listen to music stored on a USB flash drive.

1. Plug a USB flash drive into the **USB IN** port on the side of your TV.

   **Caution**
   
   Do not remove the USB flash drive or turn off your TV while using the USB flash drive. You may lose data or damage the USB flash drive.

2. Press ▲ or ▼ to highlight the **Roku Media Player** or **USB Media Player** tile, then press **OK**.

   ![Side of TV image showing USB IN port and USB flash drive.]
Connecting headphones

When you connect headphones, your TV speakers are muted and sound only plays through the headphones.

**Warning**

Loud noise can damage your hearing. When using headphones, use the lowest volume setting on your headphones that still lets you hear the sound.

- Connect the headphones to the jack on the side of your TV.

**Note**

You can also connect a home theater system, sound bar, or external speaker system to the jack.
Connecting external speakers or a sound bar

When you connect external speakers or a sound bar, sound plays through your TV speakers and the external speakers or sound bar.

You can connect external speakers or a sound bar using the:

- Digital optical audio jack
- ARC jack

Digital optical audio jack

1. Make sure that your TV's power cord is unplugged and the digital speaker system or sound bar is turned off.
2. Connect a digital optical audio cable (not provided) to the OPTICAL DIGITAL AUDIO OUT jack on the side of your TV and to the digital optical AUDIO IN jack on the digital speaker system or sound bar.
3. Plug your TV's power cord into a power outlet, then turn on your TV.
4. Turn on the digital speaker system or sound bar, then set it to the correct source. For more information, see the documentation that came with the digital speaker system or sound bar.
5. To turn off your TV speakers, on the Home menu, press ▲ or ▼ to highlight Settings, then press OK. Highlight Audio, then press OK. Highlight TV speakers, then press OK. Press OK to remove the check from the TV speakers enabled check box.
ARC jack

Your TV can send sound to an ARC device, like an AV receiver, to create a home theater that uses two or more speakers. When you connect external speakers or a sound bar, sound plays through your TV speakers and the external speakers or sound bar.

1. Make sure that your TV's power cord is unplugged and the digital speaker system or sound bar is turned off.
2. Connect an HDMI cable (not provided) to the HDMI1 (ARC) jack on the back of your TV and to the HDMI IN jack on the digital speaker system or sound bar.
3. Plug your TV's power cord into a power outlet, then turn on your TV.
4. Turn on the digital speaker system or sound bar, then set it to the correct source. For more information, see the documentation that came with the digital speaker system or sound bar.
5. To turn off your TV speakers, on the Home menu, press ▲ or ▼ to highlight Settings, then press OK. Highlight Audio, then press OK. Highlight TV speakers, then press OK. Press OK to remove the check from the TV speakers enabled check box.
6. To configure the HDMI1 (ARC) jack to output sound to an ARC device, on the Home menu, press ▲ or ▼ to highlight Settings, then press OK. Highlight System, then press OK. Highlight Control other devices (CEC), then press OK. Highlight HDMI ARC, then press OK to check the box.
Connecting a home theater system with multiple devices

You can connect an AV receiver and your devices to create a home theater.

The connections you make depend on the video and audio jacks available on your devices. Refer to the documentation that came with your devices for connection information.

Just remember to use the best connection types available for the best picture and sound. For information about connection types, see What connection should I use? on page 14.

For information about TV settings for home theaters, see Using your TV in a home theater on page 61.
Connecting power

You should connect devices before you connect the power cord. When you are adding devices, make sure that the power cable is unplugged from the power outlet.

1. Connect the AC power cord to the power connector on the back of your TV.
2. Connect the other end of the cord to a power outlet.

**Caution**

- Your TV should only be operated from the power source indicated on the label.
- Always unplug the power cord from the power outlet when you will not be using your TV for an extended period of time.
Installing remote control batteries

Open the back of your TV remote control and insert two AAA batteries, observing the proper orientation. Reattach the back cover.

TV remote control on page 12 explains how to use the remote control in each of your TV’s operating modes.

Cautions

- Batteries should not be exposed to excessive heat, such as sunshine, heat registers, or fire.
- Battery chemicals can cause a rash. If the batteries leak, clean the battery compartment with a cloth. If chemicals touch your skin, wash immediately.
- Make sure that batteries are disposed of correctly. Do not burn or incinerate.

Notes

- Do not mix batteries of different types.
- Do not mix old and new batteries.
- Remove batteries when the charge is depleted.
- If the remote control is not going to be used for an extended period of time, remove the batteries.

Aiming the remote control

- Point the remote control towards the remote sensor on the front of your TV.
Guided Setup

With the preliminaries out of the way, it’s time to turn on your LG TV powered by Roku TV. As your TV starts for the first time, it leads you through Guided Setup, which configures your TV before you start to use it. During Guided Setup, you’ll:

• Answer a few questions
• Provide network connection information
• Get a software update
• Link your TV to your Roku account.
• Connect devices such as a DVD player, game console, or cable box.

Note

Guided Setup only runs the first time you turn on your TV. If you need to run Guided Setup again, you’ll have to perform a factory reset, as explained in Factory reset everything on page 63.

Starting Guided Setup

To start Guided Setup, press the POWER button on the remote control to turn on your TV.

When you first turn on your TV, it will take a few seconds to get itself ready. You’ll notice the following things happening:

1  The status light blinks every time your TV is busy doing something; in this case it’s powering up and getting ready for you.

2  The power-on screen appears and the status light blinks slowly for a few more seconds. The power-on screen displays an LG TV powered by Roku TV logo while your TV starts up.

3  After a few seconds, Guided Setup starts:
Setting up your TV

With the first Guided Setup screen on your TV, follow these steps to set it up:

1. Press OK or RIGHT on the remote control to go to the next screen:

   ![Guided Setup Screen]

2. Press OK to select Set up for home use. Home mode is the right choice for enjoying your TV. It provides energy saving options as well as access to all features of your TV.

   **Note**
   
   Store mode configures your TV for retail display and is not recommended for any other use. In store mode, some features of your TV are missing or limited. To switch from one mode to the other, you have to perform a factory reset as explained in Factory reset everything on page 63, and then repeat Guided Setup.

   After you select Set up for home use, your TV scans for the wireless networks within range and displays them in order, with the strongest signals first. In addition to your own wireless signal, your TV might pick up signals from your neighbors.

   ![Choose your network]

3. Press UP or DOWN to highlight the name of your wireless network, and then press OK to select it.
Other options:

- **Connect to the Internet later** — If you’re unable to connect to the Internet, that’s OK. You can skip this step and use your TV to watch broadcasts, play games, and watch DVDs. If you want to connect later, it’s easy. We’ll show you how in Benefits of connecting on page 38. Connecting your TV enables you to choose from thousands of streaming channels so your TV really wants you to connect, and will try a couple more times to convince you that connecting is a good idea.

  **Note**
  
  If you decide not to connect, Guided Setup skips ahead to setting up the devices that you’ve connected to your TV. See Non-connected LG TV powered by Roku TV Home screen on page 38 to get started using your non-connected TV.

- **Scan again / Scan again to see all networks** — This option depends on the number of wireless networks within range.
  
  - **Scan again** appears if the list already shows all available wireless networks within range. If you don’t see your wireless network name in the list, you might need to adjust the location of your wireless router or your TV, turn on your router, or make other changes. When everything is ready, select Scan again to see if your network name now appears in the list.
  
  - **Scan again to see all networks** appears if your TV finds more than seven wireless networks, because your TV initially displays only the strongest seven networks. If you don’t see your wireless network name in the list, this option displays the complete list. If you still don’t see your network name, you might have your router configured to provide wireless service as a “private network.”

  **Note**
  
  Highlighting either of these options displays an informational panel with the unique media access control (MAC) address of your TV. You will need the MAC address if your wireless router is configured to use MAC address filtering.

- **Private network** — If your wireless network name is hidden, it won’t appear in the list. Select Private network to display an on-screen keyboard, and use it to enter your network name. Unless you changed the factory-set network name, you can find the name (also called SSID) on a label on the router.

  **Tip**
  
  Wireless networks that are password-protected display a “padlock” icon adjacent to the name.

  ![MyHomeNetwork](image)

4 If your network is password-protected, an on-screen keyboard appears. Use the keyboard to enter the network password.

5 After you submit your network password, your TV displays progress messages as it connects to your wireless network, your local network, and the Internet.
6 Your TV needs to know the local time zone so that it can correctly display time information about the program you are currently watching. If your TV is unable to automatically determine the local time zone, it prompts you to choose your time zone from a list. Use the **UP** or **DOWN** buttons to highlight your time zone, and then press **OK**.

<table>

</tbody>
</table>

7 As soon as your TV is able to connect to the Internet, it downloads and installs its first software update, and then restarts.

### Tips
- Your TV automatically checks for updates periodically. These updates provide new features and improve your overall experience with your TV. After an update, you might notice that some options have moved, and that there are new options or features.
- You can download an updated User Guide that matches your TV software version from the LG web site at: [www.lg.com/us](http://www.lg.com/us)
- To determine your current LG TV powered by Roku TV software version, go to **Settings > System > About** after you complete Guided Setup.

After your TV restarts, it displays the **Activation** screen:

<table>
<thead>
<tr>
<th>Feature</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Activate your TV to access</td>
<td>Here’s how</td>
</tr>
<tr>
<td></td>
<td>From your PC, phone, or tablet, go to: <a href="http://www.roku.com/lok">www.roku.com/lok</a></td>
</tr>
<tr>
<td></td>
<td>Then, enter this code:</td>
</tr>
<tr>
<td></td>
<td>XXXXX</td>
</tr>
<tr>
<td>1,000+ streaming channels</td>
<td>Once done, this screen will automatically update (press for help)</td>
</tr>
<tr>
<td>200,000+ movies and TV episodes</td>
<td></td>
</tr>
</tbody>
</table>
8 Using a computer, tablet, or smartphone with an Internet connection, go to the web address displayed on the screen and enter the code that appears on your screen.

After you log in or create your Roku account, your TV gets an acknowledgement and adds your preexisting streaming channels, if any, to your TV. This process is automatic and takes a few moments—a little longer if you already have a lot of streaming channels to add.

**Tip**

Streaming channels from all Roku devices associated with your account are synchronized periodically, so all of your Roku devices have the same streaming channels (subject to compatibility with the device).

**Note**

Channel availability is subject to change and not all content is available in countries or regions where Roku products are sold.

After it adds your selected streaming channels, your TV helps you set up the devices that you’re connecting to it, such as a cable box, Blu-ray player, or game console:

**Why do I need a Roku Account?**

You need a Roku Channel Store account for several reasons.

- It links you, your TV and your other Roku devices to the Roku Channel Store and billing service.
- Streaming content providers know that it’s OK to send content you request to your TV.
- Roku can automatically send updates to your device.

**Important:** It doesn’t cost anything to use and maintain your Roku Channel Store account (other than the cost of the TV and Internet service). Roku is packed with hundreds of free channels. Adding a payment method now lets you easily rent/buy movies on demand, or try popular streaming channels.

9 Press **OK** or **RIGHT** to proceed:
10 Connect all the devices you plan to use with your TV, turn them all on, and then select **Everything is plugged in and turned on**. Your TV now takes you step by step through each of its inputs and asks what kind of device you have connected. On each input that has a connected and active device, you can see its picture and hear its sound.

![Roku TV Set up - Devices](image)

11 Press **UP** or **DOWN** to highlight the label you want to associate with the input, and then press **OK** to move on to the next input.

You’re done with Guided Setup.

**If your TV is connected to the Internet**: To ensure you have a great Roku TV experience, we’ll show you an introductory video filled with some great hints and tips. If you’re not interested, press 🏷️ on the remote control to exit the video and go to your TV **Home** screen.

![Roku TV](image)

All done >

When you finish Guided Setup, and whenever you press 🏷️ on the remote control, the **Home** screen greets you. From here, you can explore everything your TV has to offer. Press the arrow buttons to move around, and press **OK** to select a highlighted item. We’ve designed your TV to encourage you to explore, and you can probably figure out most of the capabilities and settings on your own. If you have any questions or difficulties, you can find answers and solutions in this guide.

If you find yourself a long way from the **Home** screen, you can always get back right away by pressing one button: 🏷️.
Connected LG TV powered by Roku TV Home screen

Here is a typical Home screen from an LG TV powered by Roku TV that's connected to the Internet and paired with a Roku account.

Personalize your Home screen

You can do a lot to personalize your Home screen and make it just right for you and your family:

• Add streaming channels by using the Streaming Channels menu option to browse the Roku Channel Store.
• Remove a tile by highlighting it and pressing \( \star \). Then highlight Remove input or Remove channel and press OK.
• Reposition a tile by highlighting it and pressing \( \star \). Then highlight Move input or Move channel and press OK. Use the arrow buttons to move the tile, and then press OK to lock it in its new position.
• Rename a TV input tile by highlighting it and pressing \( \star \). Then highlight Rename input and press OK. Highlight a new name in the list, and then press OK to assign that name to the tile.
• Change the screen theme by going to Settings > Themes to find and pick one to suit your mood.
• Hide Movie Store, TV Store, or News, (US models only) as explained in Blocking Movie Store, TV Store, and News (US TV models only) on page 55.
Non-connected LG TV powered by Roku TV Home screen

Here is a typical Home screen from an LG TV powered by Roku TV that is not connected to the Internet.

Personalize your Home screen

You can do a lot to personalize your Home screen and make it just right for you and your family:

- Remove a tile by highlighting it and pressing *Remove input*. Then highlight Remove input and press OK.
- Reposition a tile by highlighting it and pressing *Move input*. Then highlight Move input and press OK. Use the arrow buttons to move the tile, and then press OK to lock it in its new position.
- Rename a tile by highlighting it and pressing *Rename input*. Then highlight Rename input and press OK. Highlight a new name in the list, and then press OK to assign that name to the tile.
- Add streaming channels by browsing the Roku Channel Store (after connecting your TV to the Internet to add the Streaming Channels option to the menu).

Benefits of connecting

Connecting brings out your LG TV powered by Roku TV's full potential!

Make any night a movie night
Thousands of movies to choose from, across all major streaming movie channels like Netflix, Cineplex Store, Crackle, and more. (Some channels require payment.) You'll never run out of something new to watch.

Get in the groove
Stream endless hours of music from channels like Spotify, VEVO, and Rdio. With on-demand access to thousands of music artists, your favorite beats are just as close as your remote.

Explore your passions
In addition to popular streaming channels like YouTube, NHL, Sky News and Cineplex Store, your TV also offers hundreds of streaming channels to fuel your passions-including fitness, cooking, religion, outdoors, International programming and much more.

Enjoy FREE trials of popular channels
Your TV comes loaded with special offers, including free trials from popular streaming channels Netflix, Spotify, Rdio, DailyBurn Fitness, and many more.
What is streaming?

Streaming is viewing or listening to video or audio content that is sent over the Internet, or located on a network-connected media server or on a USB device plugged into your TV’s USB port.

With streaming, you can watch most programs on demand, when it’s convenient for you. When streaming, you can play, pause, rewind, and fast forward whatever you are watching. You can also replay the last few seconds again, or turn on closed captions.

<table>
<thead>
<tr>
<th>Tip</th>
</tr>
</thead>
<tbody>
<tr>
<td>Subscription or other payment may be required to access certain content. Some content cannot be paused or skipped. For example, if you are viewing live programming or a program that is supported by ads, you generally are not allowed to skip the ads.</td>
</tr>
</tbody>
</table>

Your TV lets you choose from thousands of streaming channels that offer a huge selection of entertainment:

- Thousands of movies and TV episodes
- Unlimited music, live and on-demand
- Tons of live and on-demand sports
- Commercial-free kids programming
- International programming in 22 languages
- 24x7 news and in-depth news commentary

Many streaming channels are free. Some streaming channels, like Cineplex and Amazon Instant Video, let you purchase or rent the latest movie releases or popular TV series. Some channels such as Netflix or Spotify charge a monthly subscription fee and others are free if you subscribe to a companion service through your cable or satellite provider. For example, HBO subscribers with participating broadcast TV provider accounts can add the HBO Go channel and watch it for free.

If you have an existing subscription to a service like Netflix or Spotify, you can just sign in with your existing user name and password.

To play streaming content that is available on the Internet, you add streaming channels to your Home screen. To add a streaming channel to your Home screen, use the Streaming Channels option on the Home screen menu to go to the Roku Channel Store, and then select the streaming channel you want to add. The streaming channel is then added to your Home screen, and you can watch it at any time.

For more information on using the Roku Channel Store feature, see Using the Roku Channel Store on page 50.

<table>
<thead>
<tr>
<th>Note</th>
</tr>
</thead>
<tbody>
<tr>
<td>Channel availability is subject to change without notice. Some channels may not be available to all households in every market or in all countries where Roku TVs are sold.</td>
</tr>
</tbody>
</table>

But what if I didn’t connect my TV?

What if you went through Guided Setup and chose Connect to the Internet later? No worries. Your TV makes it easy to connect whenever you want. As you move around the Home screen, you’ll see several places where you can start the connection process. For example:

- Now and then you’ll see a message appear on the panel to the right of the Home screen offering a Connect Now option. Simply highlight and select the Connect Now option to get started.
- Use the Connect and activate now option in the Settings menu. From the Home screen menu, select Settings, Network, and then Connect and activate now.
- If you want to start over from the beginning, use the Settings menu to do a Factory reset, and then go through Guided Setup again. This time, choose your home network when prompted.

Regardless of how you connect, the process is the same. If you need details, see Step 3 on page 32 under Setting up your TV.
Setting up Antenna TV

Despite all of the entertainment possibilities of your TV, you may also want to watch broadcast TV. You watch broadcast TV in much the same way you watch other entertainment choices. You select a tile—the Antenna TV tile—from the Home screen.
The first time you select the Antenna TV tile, you have to set up the TV tuner. Setting up the TV tuner scans for active channels and adds them to your broadcast TV channel list.

Why do I have to set up the TV tuner?

You might be asking, “Why is this step necessary?” Good question. Not everyone needs to use the TV tuner. For example, you might have a set top box provided by a cable or satellite company that receives all of your channels. Most of these set top boxes use an HDMI® connection.

More and more people are watching only streaming TV and do not have a TV antenna or cable/satellite service. If you don’t need the TV tuner, you can bypass setting it up and instead remove it from the Home screen as explained in Remove unwanted tiles on page 53.

When you set up Antenna TV, your TV scans the signals on its antenna input for channels with a good signal, and adds those to the channel list, skipping dead channels and channels with a very weak signal.
Your TV will, however, let you add two analog channels, even if they have no signal. You might need to add these channels if you have an older set top box, VCR, or game console that can only output a signal on analog channel 3 or 4. These are the only channels that can be added regardless of whether they have a good signal. Typically, you’ll only need one of these channels, but both are provided to make setup simpler. You can hide the one you don’t want as explained in Edit broadcast TV channel lineup on page 52.

How do I set up the TV tuner?

Setting up the TV tuner is easy—your TV does most of the work. You just have to answer a couple of questions.
1. Make sure your antenna (sold separately) or TV cable is connected to your TV's ANT/CABLE input.
2. On the Home screen, select the Antenna TV tile.
3. Read the simple on-screen instructions and select Start finding channels.

4. If prompted, select your time zone. You’ll only need to do this if your TV can’t figure out your time zone from your Internet connection.
5 When prompted, select whether to add analog channels 3 and 4 (to enable you to connect older set top boxes, VCRs, or game consoles).

6 Wait while your TV scans for broadcast (antenna TV) stations...

... and then cable TV channels.

Tip
Cable TV channels are channels from a cable TV provider that you can receive by connecting their cable directly to your TV (unscrambled NTSC, ATSC, and QAM channels, if you're the kind of person who is interested in the details). In many cases, your cable provider probably requires you to use their set-top box and connect it to a different input, and then use the set-top box to tune your cable stations. In that case, you can skip scanning for cable channels.
When the channel scans finish, your TV shows the number of channels it added.

Scanning for channels can take several minutes.

**Tip**
Repeat the channel scan from time to time to make sure you are receiving all of the latest channels. Broadcasters add and remove channels, move channels to different parts of the spectrum, and change the power levels of their channels periodically.

**Note**
You’ll have to repeat the channel scan if you remove the Antenna TV tile from the Home screen or perform a factory reset. To repeat the channel scan at any time, go to Settings > TV inputs > Antenna TV > Scan again for channels. Your antenna reception and picture quality depend on the position of your antenna and on your location relative to the antennas of broadcasters in your area.

Now, you’re ready to watch broadcast TV! While you’re watching, try the following:
- Press **UP** or **DOWN** to change channels.
- Press **RIGHT** to display the channel list and then use **UP** or **DOWN** to select a channel to watch. Or press **REWIND** or **FAST FORWARD** to jump through the channel list a page at a time.
- Press **OK** to display information about the current program.
- Press  to switch to the previously tuned channel.
- Press  to see options for picture and sound settings.

**Note**
If  is not available on your remote control, you can use  on the Roku mobile app or the Jump Back button on a universal remote. For more information, see Other devices on page 65.
TV remote control on page 12 has more information on using the remote control buttons while watching TV.
Using your LG TV powered by Roku TV

This section provides information on using the day-to-day features of your TV.

TV status light

Your TV has a single status light on the front panel. It goes on and off and blinks in different ways depending on the status of the TV, as shown in the following table:

<table>
<thead>
<tr>
<th>TV condition</th>
<th>Status indicator</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>On (screen is active)</td>
<td>Off</td>
<td>Screen is communicating that your TV is on.</td>

</tr>
<tr>
<td></td>
<td>standby.</td>
<td></td>
</tr>
</tbody>
</table>

Standby mode energy savings

About 10 minutes after you turn off your TV, it goes into a very low power standby mode. Until that happens, if you turn on your TV again, it immediately displays the activity you selected in the Power on settings, as described in Power on settings on page 54. After your TV goes into the low power standby mode, it takes a bit longer to start up.

Watching broadcast TV channels

To watch broadcast TV, select the Antenna TV tile in the Home screen. Your TV remembers the last channel you watched and starts with that channel playing.

Tip

You also can use the buttons on the TV panel to select Antenna TV, as explained in Buttons on page 10.

Changing channels

To change channels, you can do any of the following:

- Press UP to change to the next higher channel.
- Press DOWN to change to the next lower channel.
- Press LEFT to display the channel list, and then press UP or DOWN to move the highlight through the list one channel at a time. Or press REWIND and FAST FORWARD to move the highlight through the list one page at a time. When you've highlighted the channel you want to watch, press OK. (If you decide you don't want to change channels, press RIGHT or BACK).
- Press ☢ to switch to the previously tuned channel.

Note

If ☢ is not available on your remote control, you can use ☢ on the Roku mobile app or the Jump Back button on a universal remote. For more information, see Other devices on page 65.
Viewing program information

To view information about the current program, press OK. Your TV displays a banner at the bottom of the screen with as much information as is available in the program data stream.

Program information, subject to availability, includes:

- Channel number
- Channel call sign
- Signal strength
- Program title
- Start time, end time, and graph of program length showing current position
- Content rating
- Video resolution (480i, 480p, 720p, 1080i, 1080p)
- Audio quality (Mono Dolby Digital, Stereo Dolby Digital, 5.1 Dolby Digital, Dolby Digital+)
- Audio features (SAP)
- Closed captioning (CC)
- Current time
- Program description. If the entire description does not fit, press OK to expand the size of the banner and see the entire description.

Adjusting settings

Press ✹ to display the Options menu. Press UP or DOWN to highlight an option, and then press LEFT or RIGHT to change the setting. Adjusting TV settings on page 46 explains each of the settings in detail.

Switching TV inputs

Switch to a TV input to access the device connected to that input, for example, a Blu-ray player. Switching inputs is as simple as highlighting the input's tile in the Home screen, and pressing OK. The video signal on the input, if any, appears on the screen.

Tip
You also can use the buttons on the TV panel to select a TV input, as explained in Buttons on page 10. Customizing your LG TV powered by Roku TV on page 51 explains how to rename and remove inputs.

Auto-detecting devices

Your TV automatically detects when you connect a new device to an HDMI input and turn on its power. The input is automatically added to the Home screen if it isn't already present.

Adjusting audio/video settings

While watching video content on any input, press ✹ to display the Options menu. Press UP or DOWN to highlight an option, and then press LEFT or RIGHT to change the setting. Adjusting TV settings on page 46 explains each of the settings in detail.
Playing content from USB storage devices

Your TV has a USB port that can be used to play personal music, video, and photo files from a USB flash drive or hard disk. If your TV is connected to the Internet, your Home screen has the Roku Media Player tile. If your TV has not been connected to the Internet, the Home screen has the USB Media Player tile.

To use this feature, first make sure your media files are compatible with the Roku/USB Media Player. As of the publication date of this guide, the following media file formats are supported:

- Video—MKV (H.264/262), MP4, MOV (H.264)
- Music—AAC, MP3, WMA, WAV (PCM), AIFF, FLAC, and AC3, and DTS
- Photo—JPG, PNG (up to 4k x 4k pixels)

To see the latest list of supported formats, view Help in the Media Player.

Notes

- The Roku/USB Media Player displays supported file types only, and hides file types it knows it cannot play.
- There are many variants of each of these media formats. Some variants may not play at all or may have issues or inconsistencies during playback.
- DTS audio, whether in music or video files, is supported only by pass-through, meaning that your TV cannot directly output the sound of a DTS file, but can pass it through to a DTS-compatible receiver that is connected to the HDMI1 (ARC) or OPTICAL DIGITAL AUDIO OUT connector on your TV.
Playing content from local network media servers

If you have connected your TV to a network, it can play personal video, music, and photo files from a media server on your local network. Media servers include personal computers running media server software such as Plex or Windows Media Player, network file storage systems that have built-in media server software, and other devices that implement the specifications of the Digital Living Network Alliance. Some servers do not fully implement the DLNA specification but are UPNP (Universal Plug and Play) compatible. The Roku Media Player will connect to them as well. Some media servers can convert files into Roku compatible formats. DRM-protected content is not supported.

Adjusting TV settings

You can adjust most picture and sound settings while you are watching a program by pressing * to display the Options menu. If you don’t find what you need, there are additional picture and sound settings in the Settings menu.

In most cases, the changes you make apply only to the input you are using. Antenna TV, each separate HDMI input, and the AV input have their own settings that your TV remembers when you return to that input. Your TV also remembers the settings you specify while viewing streaming content.

Settings menu

Use the Settings menu to adjust overall TV settings. Press * to go to the Home screen, and then navigate to Settings>TV picture settings.

You can adjust the following overall TV picture settings from the Settings screen:

- **TV brightness**—If the lighting level in your TV room changes, use this setting to help provide a better viewing experience; set to darker for a darker room, and brighter for a brighter room. Choose among Normal and four other settings to make the overall picture brighter or darker. So that you don’t have to make this type of change for each TV input one at a time, this setting increases or decreases your TV’s general brightness across all TV inputs.

  **Note**
  
  This setting is identical to the TV brightness setting you can access in the Options menu while watching a program.

- **Settings per input**—This section of options lists each TV input. Select an input to switch to that input. Then press * to display the Options menu, where you can adjust the input’s settings while watching a live picture and listening to the sound from that input.

  **Tip**
  
  You don’t have to go to the Settings menu first—you can display an input’s Options menu and adjust its settings whenever you are watching the input by pressing *.

Options menu

The Options menu for each TV input provides settings for controlling the appearance of the picture and the quality of the audio.

To view the Options menu, press * whenever you are watching a TV input or streaming a video. The Options menu is a panel that appears over the left side of the screen:
To adjust the settings on the Options menu, press UP or DOWN to highlight a setting, and then press LEFT or RIGHT to change the setting. You'll notice the changes you make right away in picture appearance or audio quality.

### Tip
When you highlight a setting, the header text explains the effect of its current value. When you begin to adjust a setting, the other options are hidden so you can see more of the screen. Even though the other settings are hidden, you can move the highlight up or down to adjust the other settings.

#### Options menu settings

- **TV brightness**—Affects the overall brightness of the picture. This setting applies across your entire TV; that is, to all TV inputs and is identical to the TV brightness setting in the TV picture settings menu.
- **Picture mode**—Provides picture presets for various viewing preferences. This setting applies to the currently-selected input only.

### Note
The **Eco save** option reduces the amount of power your TV consumes. For more information about picture modes, see Advanced picture settings menu options on page 48.

- **Audio mode**—Adjusts the sound quality output from the TV speakers. This setting applies across your entire TV; that is, to all TV inputs. It does not affect the sound quality for headphones, HDMI1 (ARC), or OPTICAL DIGITAL AUDIO OUT (TOSLINK) connectors.
- **Sleep timer**—Sets a timer that turns off your TV after the specific amount of time. This setting remains in effect even if you stop watching the current input.
- **Closed captioning**—Controls when you see captions. This setting is only offered for Antenna TV, the AV input, and streaming videos. Any set value remains in effect across only these inputs.
  - **Antenna TV**—Turn captions on or off, or set them to appear only when your TV sound is muted.
  - **AV input**—Turn captions on or off, or set them to appear only when your TV sound is muted.
  - **Streaming video channel**—Turn captions on or off, set them to appear only when your TV sound is muted, or only during instant replay (for streaming content that supports instant replay).

### Tip
If the Instant Replay button is not available on your remote control, you can use the Jump Back button on a universal remote. For more information, see Other devices on page 65. Additional captioning options are provided in the Captions screen in Settings.

- **Captioning track**—Selects which caption track to display when Closed Captioning is on. This setting remains in effect on all inputs that provide captions.
- **SAP**—Selects whether to play a secondary audio program or multichannel television sound, and which choice to play. This setting applies only to Antenna TV on digital channels.

### Tip
To dismiss the Options menu, just wait a few seconds without pressing any buttons. Or press * again to dismiss the menu immediately.
Advanced picture settings

The Advanced picture settings menu for each TV input provides settings for fine tuning the appearance of the picture. All of the settings in this menu apply only to the currently-selected input.

To use the Advanced picture settings menu, first press * to display the Options menu. Then select Advanced picture settings.

To adjust the settings on the Advanced picture settings menu, press UP or DOWN to highlight a setting, and then press LEFT or RIGHT to change the setting. You’ll notice the changes you make right away in picture appearance.

Tip

When you highlight a setting, the header text explains the effect of its current value. When you begin to adjust a setting, the other options are hidden so you can see more of the screen. Even though the other settings are hidden, you can move the highlight up or down to adjust the other settings. As soon as you press UP or DOWN, the other settings become visible again.

Advanced picture settings menu options

- **Picture mode**—Provides picture presets for various viewing preferences. This setting duplicates the one on the Options menu. When you change the Picture mode, other picture settings adjust accordingly.

  For example, setting the Picture mode to Vivid sets Brightness, Contrast, Sharpness, and other values to produce a very vibrant picture. Setting Picture mode to Movie changes these same settings to produce a picture suitable for enjoying movies in a darkened room.

  If you make changes to the individual picture settings—for example, Contrast or Sharpness—these settings are saved for the current input and the current picture mode. In this way, the HDMI 1 input’s Movie picture mode can be customized and different than the HDMI 2 input’s Movie picture mode and Antenna TV’s Movie picture mode.

  Eco save is a power-saving picture mode that reduces power consumption by about 10%. When you use Eco save, you’ll notice that your TV’s picture is a little dimmer than the brightest picture modes (Vivid and Normal).

  Use Reset picture settings, described below, to return the input’s current picture mode to its original values.

- **Dynamic Contrast**—Automatically adjusts the backlight level to achieve the optimum contrast and prevent excessive differences between light and dark areas of the screen. The Backlight option is disabled when Dynamic Contrast is enabled.

- **Backlight**—Adjusts the overall light intensity of the screen.

- **Brightness**—Adjusts the dark level of the black areas of the picture.

- **Contrast**—Adjusts the white level of the light areas of the picture.

- **Sharpness**—Adjusts the sharpness of the edges of objects in the picture.

- **Color**—Adjusts the intensity of colors in the picture. A setting of 0 removes all color and displays a black and white picture.

- **Tint**—Adjusts the color balance from green to red to obtain accurate colors in the picture.

- **Color temperature**—Adjusts the overall colors in the picture from Normal to slightly more bluish (Cool) to slightly more reddish (Warm).
• **Picture size**—Adjusts the aspect ratio of the picture, enabling you to view a picture in its original format, or zoom or stretch it to fill the screen. The Auto setting has been known to produce the best picture in most cases.

• **Game mode**—Controls whether Game mode is on or off. When On, your TV performs less image processing and has less input lag. When Off, your TV may perform more image processing and has more input lag, which is less desirable for action games. Available only for HDMI and AV inputs.

• **Reset picture settings**—Returns all picture settings for the input’s currently-selected **Picture mode** to their original values.

## The Roku Feed

Use The Roku Feed to find out when you can watch upcoming movies. The Roku Feed gives you updates on the movies coming soon to theaters that interest you the most. With The Roku Feed, you’ll know when your favorite movie is ready to stream, the channels it is on, and how much it will cost. You also will be alerted any time a movie becomes available on another channel and whenever its price changes. When you see a movie that interests you, you can select **Follow this movie on Roku** to add it to **My Feed**.

<table>
<thead>
<tr>
<th>Note</th>
</tr>
</thead>
<tbody>
<tr>
<td>When a movie you are following becomes available, the streaming channel offering the movie might require you to subscribe or pay a fee to view it.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Tip</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Roku Feed is available only if your TV is connected to the Internet.</td>
</tr>
</tbody>
</table>

## Searching for movies & shows

Searching for movies and shows across multiple streaming channels is one of the unique features of your TV. Within a single search operation, you can search by:

- Movie name
- TV show name
- Actor or director name
- Streaming channel name
- Game name

<table>
<thead>
<tr>
<th>Tip</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Roku Feed is available only if your TV is connected to the Internet.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Note</th>
</tr>
</thead>
<tbody>
<tr>
<td>Roku Search doesn’t search across all streaming channels, but searches across lots of popular streaming channels. The actual channels it searches vary by locale, but include popular providers such as Netflix and several others, with more being added all the time.</td>
</tr>
</tbody>
</table>

You can check which streaming channels are included in Roku Search by going to the Search screen, clearing all previous searches to reveal the search instructions, and then watching the channel tiles cycle at the bottom of the screen.

To search, select **Search** on the Home screen menu. The Search screen has a keyboard grid and initially displays instructions—a set of icons representing search categories and a list of participating provider tiles.

<table>
<thead>
<tr>
<th>Tip</th>
</tr>
</thead>
<tbody>
<tr>
<td>If you don’t see the instructions, navigate to the end of the list of recent searches and select <strong>Clear recent search selections</strong>.</td>
</tr>
</tbody>
</table>
How do I search?

To search, use the arrow buttons to enter a few characters of the search term. With each additional character you enter, you narrow down the search and the search results become more relevant.

**Tip**
Use the free Roku mobile app on your smartphone or tablet to make searching even faster. Not only can you use your device’s keypad to type, you can search simply by touching a voice search icon and saying the name of the movie, TV show, actor or director, channel, or game.

An icon next to each search result shows the category of the result (movie, TV show, actor).
- Press **RIGHT** to highlight the search results.
- Press **UP** or **DOWN** to scroll through the list of search results to highlight the item you want to view.

I found a show, now what?

Now that you’ve highlighted the show, movie, actor, game, or streaming channel you were looking for, press **RIGHT**. If your search result was an actor, director, or other item that does not represent a single item of content, you’ll see another list to narrow down your search. Continue highlighting results and pressing **RIGHT** until you find a single, viewable content item.

An HD logo means that the content is available in high-definition. The checked circle adjacent to the title means you have already added the streaming channels.

When you narrow down your search to a game or streaming channel, you’ll see detailed information, images, and available actions such a list of streaming channels and the cost of getting the item on each channel.

The next time you use Roku Search, the **Search** screen displays a list of recent search selections in place of the search instructions.

Using the recent search selections list makes it easy to quickly get to a previously found item, for example, to find another movie with the same actor, or another TV show in the same series.

Using the Roku Channel Store

The **Streaming Channels** menu option takes you to the Roku Channel store, where you can add new streaming channels to your TV.

**Tips**
- The **Streaming Channels** menu option is available only if your TV is connected to the Internet.
- You also can search for streaming channels by using the **Search** option, as explained in Searching for movies & shows on page 49.

To make it easier to find what you want, the streaming channels in the Roku Channel Store are categorized by topic. Press **UP** or **DOWN** to highlight the category you want, and then press **RIGHT** to move the highlight into the grid of streaming channel tiles.

When you find a streaming channel you want to add or learn more about, highlight it and press **OK** to display more details.
- If the streaming channel you are adding is free, you can select **Go to channel** to start watching it immediately.
- If there is a one-time or recurring fee associated with using the streaming channel, you must agree to the terms and conditions, accept the fee, and—if you created one when you activated your TV, enter your Roku PIN code to authorize the charges.
- If you already have a subscription to the streaming channel—for example, you already subscribe to Netflix or you receive HBO through your cable TV provider—you must complete a different, simple authorization step to add the streaming channel.

You only have to complete the authorization or activation step one time, when you initially add the streaming channel. After that, you simply select the streaming channel tile from your **Home** screen to start watching. (Channel availability is subject to change.)

**Tip**
New streaming channels are added continuously, so be sure to check back every now and then.
Customizing your LG TV powered by Roku TV

There are several things you can do to personalize your TV.

Rearrange tiles

Whenever you add a TV input tile, it’s added at the top of your Home screen. Whenever you add a new streaming channel from the Roku Channel Store, it’s added at the bottom of your Home screen.

You can easily rearrange the order of the tiles on the Home screen to suit your viewing preferences. For example, you might want Antenna TV to be the first tile in your Home screen. But if you mostly watch one streaming channel, you might want its tile to be the first one on your Home screen.

Rearranging tiles is easy:

1. From the Home screen, highlight one of the tiles you want to move.
2. Press *) to display a list of options for the type of tile you selected.
3. Select Move input. The list of options disappears and the highlighted tile shows arrows indicating how it can be moved.
4. Use the arrow buttons to move the highlighted tile to its new position. As you move the tile, it pushes other tiles out of its way.
5. Press OK to lock the tile into its new position.
6. Repeat these steps to move other tiles until you have arranged your Home screen to your liking.
Edit broadcast TV channel lineup

When you set up the TV tuner as described in Setting up Antenna TV on page 40, the TV adds all the channels with good signals that it could detect in your area. It’s likely that you now have more channels than you want in your channel list.

To edit the channel lineup, from the Home screen, navigate to Settings>TV inputs >Antenna TV>Edit channel lineup. You’ll see a screen listing all of your channels. Adjacent to the list of channels is a miniature TV screen playing the highlighted channel’s picture and sound.

Highlight each channel you want to hide, and then press OK to hide the channel.

Tip

If you need to see or hear the highlighted channel, wait a couple of seconds for your TV to start playing the channel’s picture and sound. Also note that if you’ve enabled parental controls and the program on the current channel is blocked, you won’t see a picture or hear sound while editing the channel lineup.
Rename inputs

Rather than trying to remember that your Blu-ray player is connected to HDMI 1 and your game console is connected to HDMI 3, you can rename the TV inputs to match the connected component.

**Tip**
Renaming an input also changes the icon associated with it.

To rename an input, you can either:
- Highlight the input tile in the Home screen, and then press ⚫ to display a list of options. From the list of options, select Rename input. Then select a new name and icon.
- From the Home screen, navigate to Settings>TV inputs. On the TV inputs screen, select the input you want to rename, select Rename, and then choose a new name and icon from the provided list. Press 🌈 to return to the Home screen. The new name and icon are now in effect.

Remove unwanted tiles

It’s easy to remove unused TV inputs and unwanted channel or app tiles. For example, if you never use the HDMI 3 input, or if you don’t like the weather app you added from the Roku Channel Store, you can remove them from your Home screen.

You also can remove the Antenna TV tile if you never use the TV tuner. But be aware that removing the Antenna TV tile also deletes the broadcast TV channel list. You’ll have to set up the TV tuner again next time you add it. Instructions for setting up the TV tuner can be found in Setting up Antenna TV on page 40.

- To remove any tile, highlight the input tile in the Home screen, and then press ⚫ to display a list of options. From the list of options, select Remove input. In the screen that follows, confirm you want to remove the input.
- Alternatively, to remove a TV input tile from the Home screen, navigate to Settings > TV inputs. On the TV inputs screen, select the input you want to remove, and then select Remove > Confirm. Then press 🌈 to return to the Home screen.

Change themes

Another way to customize your TV is to change its theme. The theme establishes the look and feel of your TV through colors, designs, and fonts.

**Tip**
Themes are available only when your TV is connected to the Internet.

To change the theme, in the Home screen menu navigate to Settings>Themes. In the Themes screen, choose from the following options:
- My themes—Highlight a theme, and then press OK to switch to that theme.
- Custom settings—Turn Featured themes on or off. When Featured themes is on, your TV automatically switches to featured themes—like certain holidays—for a limited time whenever Roku makes them available, and then switches back to your selected theme when the featured theme expires. When off, your TV always uses your selected theme.

Change the screensaver

Displaying a still image (such as a logo) for an extended period of time can cause a permanent after-image to be burned into the screen. To avoid after-image burn-in, your TV turns on a screen saver after it is idle for a few minutes. To change the screensaver, in the Home screen menu navigate to Settings>Screensaver, and then select a screensaver.

**Tip**
The Power Saver screensaver reduces the amount of power your TV uses by turning off the backlight. For example, if the Picture mode is set to Vivid or Normal, Power Saver reduces power consumption up to 70%.

Change sound effects volume

Sound effects are the noises your TV makes to let you know it received your command. You can change the volume of sound effects or turn them off.

To adjust the sound effects volume, in the Home screen menu, navigate to Audio>Menu volume. Navigate to the right and then change the setting to High, Medium, Low, or Off.
Configure power settings

Power settings let you set up your TV so that it turns on to the location you choose. Power settings also help your TV save energy by automatically turning it off under certain conditions.

Power on settings

Power on settings tell your TV what to do when you turn on the power. To configure the power on settings, from the Home screen menu, navigate to Settings > System > Power > Power on. Highlight the power on location from the list, and then press OK to select it.

Auto power off settings

To help you save energy, your TV can automatically turn itself off after a period of inactivity or a period during which no signal has been detected. It is factory-configured to do both of these things, but you can change these settings if needed.

To configure automatic power off, from the Home screen menu navigate to Settings > System > Power > Auto power off. In the Power settings screen, highlight the following options and press OK to turn them on or off:

- **After 15 minutes of no signal**—If no signal is detected on a TV input for 15 minutes, your TV automatically powers off.
- **After 4 hours of no interaction**—If no remote control or panel button is pressed for 4 hours and your TV is not displaying a TV signal or streaming a video, your TV is automatically powered off.

Configure parental controls

Parental controls enable you to control whether the members of your household can view certain kinds of broadcast TV programs. When a program or feature is blocked, you can unblock it by entering a parental control PIN that only you know.

Creating a parental control PIN

The first time you access the Parental controls screen, you must create a new parental control PIN. Thereafter, whenever you want to change parental control settings, unblock programming that has been blocked, change the PIN, or disable parental controls, you must enter your parental control PIN.

Your parental control PIN has nothing to do with your Roku PIN. You can make them the same if you want—this is entirely your choice.

To create a new parental control PIN, from the Home screen menu navigate to Settings > Parental controls. The screen displays a numeric keypad. Use the arrow buttons and the OK button to enter a four digit code. Then repeat the process to enter the same PIN again, just to make sure you correctly entered the PIN you want to use.

If you forget your PIN, the only way to recover is to perform a factory reset operation, as explained in Factory reset everything on page 63. Be sure to write it down in a safe place just in case.
Blocking Movie Store, TV Store, and News (US TV models only)

One of the parental control options is to completely hide the entertainment options that are available directly on the Home screen menu of Roku TVs manufactured for sale in the United States.

To hide Home screen entertainment options:

1. From the Home screen menu, navigate to Settings >Parental controls, and then enter your PIN.
2. In the Parental controls screen, highlight Home screen and then select or clear either of these options:
   - Hide “Movie Store and TV Store”—Removes the Movie Store and TV Store options from the Home screen menu.
   - Hide “News”—Removes the News option from the Home screen menu.

**Tip**

To use either of these options after you’ve hidden them, you must return to this screen and remove the check mark from the corresponding Hide command.

Blocking Broadcast TV shows

For broadcast TV, parental controls use information embedded in the broadcast signal to determine whether to allow a program to be displayed. Parents can configure parental controls to block broadcast TV programs that meet or exceed a specific rating, so they cannot be viewed or heard unless the correct parental control PIN is entered.

Enabling parental control of TV shows

The first step in blocking TV shows is to enable parental control of TV shows.

This setting is provided separately to make it easier for you to turn parental control of TV shows on and off without disturbing their settings. For example, your kids are going to summer camp for two weeks, and while they are gone, you don’t want to have to deal with unblocking shows that you want to watch by entering your PIN. All you need to do is clear Enable parental controls, and all TV shows are unblocked. When the kids return, select Enable parental controls again, and all of your parental control settings are restored in a single operation.

To enable parental control of TV shows:

1. In the Home screen menu, navigate to Settings >Parental controls, and then enter your PIN.
2. In the Parental controls screen, navigate to TV tuner> Parental control of TV shows.
3. Make sure the check box next to Enable parental controls is checked. If not, highlight it and press OK.

Blocking based on US TV ratings

Most broadcast US TV shows—other than movies—contain rating data that enables parental controls to block shows that parents don’t want others to view. The ratings are divided into two groups that function independently:

- **Youth group**—TV-Y, TV-Y7
- **Main group**—TV-G, TV-PG, TV-14, TV-MA

Within each of these groups, the ratings interact such that if you block a particular level of content, your TV also blocks all content with a higher rating. Conversely, if you unblock a particular level of content, your TV also unblocks all content with a lower rating. For example, if you block TV-PG programs, your TV also blocks TV-14 and TV-MA programs. If you subsequently unblock TV-14 programs, TV-PG programs are also unblocked, but TV-MA programs remain blocked.

Similarly, within the main group, content types can be individually blocked. For example, you can block just coarse language in shows with a TV-PG rating. If you do, then your TV also blocks shows with coarse language in the higher ratings (TV-14 and TV-MA). Subsequently unblocking coarse language in TV-14 ratings does not unblock coarse language in TV-MA programs, but it does unblock coarse language in TV-PG programs.

To block TV shows based on US television ratings:

1. From the Home screen menu, navigate to Settings >Parental controls, and then enter your PIN.
2. In the Parental controls screen, navigate to TV tuner> TV ratings. Choose among the following settings:
   - **Entire ratings**—Highlight the rating you want to block, and then navigate to the right and select the first option that blocks the entire rating level (and all higher rating levels).
   - **Individual content types**—Highlight the rating that contains the content type you want to block, and then select the content types you want to block from among those listed. Remember that blocking a content type in one rating blocks the equivalent content type in all higher rating levels.
Blocking based on US movie ratings
Most movies in the US are rated by the Motion Picture Association of America, or MPAA, so the ratings are known as MPAA ratings. TV broadcast signals carry movie rating data that enables parental controls to block shows that parents don’t want others to see. The ratings are:

- G—General audiences
- PG—Parental guidance suggested
- PG-13—Parents strongly cautioned for children age 13 or younger
- R—Restricted
- NC-17—Not for age 17 or younger

Unlike US TV ratings, there are no individual content types within the ratings. But like TV ratings, blocking movies with a particular rating also blocks movies with a higher rating, and unblocking movies with a particular rating also unblocks movies with a lower rating.

<table>
<thead>
<tr>
<th>Tip</th>
</tr>
</thead>
<tbody>
<tr>
<td>Blocking movies with an NC-17 rating also blocks programs with the now-obsolete X rating, which can still occur in the program data of older movies.</td>
</tr>
</tbody>
</table>

To block movies based on MPAA ratings:
1. From the Home screen menu, navigate to Settings >Parental controls, and then enter your PIN.
2. In the Parental controls screen, navigate to TV Tuner>Movie ratings.
3. Select the rating level you want to block. You need only select one rating level, and all higher levels are automatically blocked.

Blocking based on Other ratings
Your TV can block programs having ratings that had not been defined when your TV was manufactured. It does this by detecting a new Rating Region Table in a program and then downloading the new table and displaying its rating in the Parental controls.

When your TV downloads a new Rating Region Table, it adds a new option to the list of rating types: Other ratings. If you see this option in the Parental controls screen, you have tuned to a station that has implemented a new rating table. Once the new rating table has been downloaded to your TV, it remains in your TV until it is factory reset, and you can configure blocking based on the new ratings.

New Region Rating Tables can have independent rating levels, or rating levels that interact in the same ways as the built-in US TV and MPAA Movie ratings.

<table>
<thead>
<tr>
<th>Tip</th>
</tr>
</thead>
<tbody>
<tr>
<td>If your TV downloads a new Region Rating Table, you’ll have to experiment with its settings to understand how to use it.</td>
</tr>
</tbody>
</table>

Blocking based on Canadian English ratings
Canadian-English language and third-language programs that are broadcast in Canada are rated by the Action Group on Violence on Television, or AGVOT. TV broadcast signals carry rating data that enables parental controls to block shows that parents don’t want others to view based on content containing violence, language, sex, or nudity. The ratings are:

- C—Children under 8 years
- C8—Children 8 years and older
- G—Generally suitable for all age groups
- G—Parental guidance suggested for viewers under 14 years
- 14+—Generally not suitable for viewers under 14 years
- 18+—Generally not suitable for viewers under 18 years

Blocking content with a particular rating also blocks content with a higher rating, and unblocking content with a particular rating also unblocks movies with a lower rating.

To block programs based on AGVOT ratings:
1. From the Home screen menu, navigate to Settings >Parental controls, and then enter your PIN.
2. In the Parental controls screen, navigate to TV Tuner>Canadian English ratings.
3. Select the rating level you want to block. You need only select one rating level, and all higher levels are automatically blocked.
Blocking based on Canadian French ratings

Canadian-French language programs that are broadcast in Canada are rated by the Régie du cinéma du Québec. TV broadcast signals carry rating data that enables parental controls to block shows that parents don’t want others to view based on content containing violence, language, sex, or nudity. The ratings are:

- G - Generally suitable for all age groups
- 8+ — Viewers 8 years and older
- 13+ — Viewers 13 years and older
- 16+ — Viewers 16 years and older
- 18+ — Adults only

Blocking content with a particular rating also blocks content with a higher rating, and unblocking content with a particular rating also unblocks movies with a lower rating.

To block programs based on Canadian-French ratings:
1. From the Home screen menu, navigate to Settings > Parental controls, and then enter your PIN.
2. In the Parental controls screen, navigate to TV tuner > Canadian French ratings.
3. Select the rating level you want to block. You need only select one rating level, and all higher levels are automatically blocked.

Blocking unrated programs

Some broadcast TV shows and movies are assigned a rating of "Unrated". Whether or not such programs contain content that is objectionable to you cannot be determined. However, you can choose to block such programs.

To block all unrated broadcasts:
1. From the Home screen menu, navigate to Settings > Parental controls, and then enter your PIN.
2. In the Parental controls screen, navigate to TV tuner > Block all unrated programs.
3. Highlight Block and press OK. When blocking is enabled, the adjacent padlock icon changed from unlocked to locked.

Tip

Blocking programs that have been assigned a rating of “Unrated” does not block programs that have no rating assigned to them (for example a broadcast of a local town council meeting). Programs that do not have an assigned rating display Rating NA (for "not applicable," meaning a rating is not needed). Programs that have no assigned rating are considered “safe”; therefore, there is no need to block them.

What happens when a TV show is blocked?

After you've set up parental controls, TV shows and movies can be blocked:

- When you change channels and the new channel is playing a program whose rating exceeds your settings.
- When a new show comes on the channel you are watching and its rating exceeds your settings.

When a program is blocked by parental control settings, your TV displays a blocked message:

Whenever this blocked message appears, both the video and audio of the show are blocked, as well as program data that would normally appear in the area at the bottom of the screen.
To watch the blocked program, you need to know the PIN code defined when you enabled parental controls, as explained in Creating a parental control PIN on page 54.

1. Press **OK** to select **Unblock** and display a PIN pad.

![Enter Parental Control Pin](image)

2. Use the arrow buttons to enter your PIN code, and then press **OK** to select **Unblock everything**.

After unblocking shows that have been blocked, all blocking is disabled for two hours or until you turn off your TV.

**Changing the parental control PIN**

To change your parental control PIN:

1. From the **Home** screen menu, navigate to **Settings >Parental controls**, and then enter your PIN.
2. In the **Parental controls** screen, highlight **Change PIN**.
3. Move the highlight into the adjacent keypad, and then use the arrow buttons and the **OK** button to enter a four digit code. Then repeat the process to enter the same PIN again, just to make sure you correctly entered the PIN you want to use.

**Resetting parental controls**

So now your kids have grown up and gone away to college, and you no longer want to deal with blocked programs. To erase all parental control settings:

1. From the **Home** screen menu, navigate to **Settings >Parental controls**, and then enter your PIN.
2. In the **Parental controls** screen, highlight **Reset parental controls**.
3. Follow the instructions on the screen to confirm that you want to erase all parental control settings.

**Tip**

Resetting parental controls also erases your parental control PIN.
More settings

This section describes the features and settings of your TV that were not covered in the other parts of this guide.

Changing network settings

If needed, you can change your network settings at any time. For example, if you change the name of your wireless network (its SSID) or its password, you will need to change your TV’s settings so that it can continue to connect. Also, if you decided not to connect to the Internet in Guided Setup on page 31, you can use Network settings to connect at a later time.

To change network settings, from the Home screen menu, navigate to Settings > Network, and then press RIGHT. At this point, you can choose the following options:

- **Update connection**—Press OK to start the update process. Your TV uses your current wireless network name and password to reconfirm the wireless connection, the local network connection, and the Internet connection.

- **Set up new Wi-Fi connection**—Press OK to start a scan for wireless networks. Your TV scans for the wireless networks within range and displays the first few it finds in order, with the strongest signals first. In addition to your own wireless signal, your TV might pick up signals from your neighbors.
  
  Now you can do one of the following:
  
  - **Select your network name**—Select the name of your network and then enter your wireless password if requested.
  
  - **Scan again**—If you don’t see your wireless network name in the list, select Scan again to list all networks in range. The first scan listed only the first few, strongest wireless signals. The second scan sometimes results in a longer list.
    
    If you still don’t see your network name, you might need to adjust the location of the wireless router or your TV, turn on your router, or make other changes. When everything is ready, select Scan again to repeat the network scan.

  **Note**

  Highlighting Scan Again displays an informational panel with the unique media access control (MAC) address of your TV. You will need the MAC address if your wireless router is configured to use MAC address filtering.

  **Note**

  Wireless networks that are password-protected display a “padlock” icon adjacent to the name.

- **Private network**—If your wireless network name is hidden, it won’t appear in the list. Select Private network to display an on-screen keyboard, and use it to enter your network name. Unless you changed the factory-set network name, you can find the name (also called SSID) on a label on the router.
Changing caption settings

You can change many different settings that affect the appearance of captions.
To change caption settings, from the Home screen menu, navigate to Settings > Captions, and then press RIGHT. At this point, you can choose the following options:

- **Captions mode**—Choose Off, On, When mute, or Instant replay.
  - If you choose On, your TV displays captions whenever they are available in the program information. This setting applies to Antenna TV, the AV input, and streaming channels.
  - If you choose When mute, your TV displays captions only when the sound is muted. This setting applies to Antenna TV, the AV input, and streaming channels.
  - If you choose Instant Replay, your TV displays captions only during a replay operation; that is, after pressing \( \text{REW} \) to jump back a few seconds in streaming video. This setting applies only to streaming channels when the program being streamed supports instant replay.

<table>
<thead>
<tr>
<th>Note</th>
</tr>
</thead>
<tbody>
<tr>
<td>If ( \text{REW} ) is not available on your remote control, you can use ( \text{REW} ) on the Roku mobile app or the Jump Back button on a universal remote. For more information, see Other devices on page 65.</td>
</tr>
</tbody>
</table>

This setting reflects the Closed captioning settings in the Options menu for certain TV inputs, as explained in Options menu settings on page 47. Note that, once enabled, the captions mode remains set for all applicable inputs until you turn it off.

<table>
<thead>
<tr>
<th>Note</th>
</tr>
</thead>
<tbody>
<tr>
<td>Some streaming channels require you to enable captions through a setting within their channel even though you have turned on captions everywhere else.</td>
</tr>
</tbody>
</table>

- **Text style**—Choose from a list of fonts. As you move the highlight to each font, you can see a sample of the result in an adjacent panel.
- **Text edge effect**—Choose from a list of edge effect styles, such as raised, depressed, and various shadows. As you move the highlight to each effect, you can see a sample of the result in an adjacent panel.
- **Text size**—Choose from a list of sizes. As you move the highlight to each size, you can see a sample of the result in an adjacent panel.
- **Text color**—Choose from a list of colors for the text. As you move the highlight to each color, you can see a sample of the result in an adjacent panel.
- **Text opacity**—Choose from a list of opacity settings for the text. This setting determines how much the area behind the text shows through the text. A value of 100% blocks all of the content behind the text. As you move the highlight to each setting, you can see a sample of the result in an adjacent panel.
- **Background color**—Choose from a list of colors for the background area behind the text. As you move the highlight to each color, you can see a sample of the result in an adjacent panel. Note that you won’t see any change unless you set the Background opacity to a value other than Off.
- **Background opacity**—Choose from a list of opacity settings for the background of the caption. This setting determines how much the area behind the caption background shows through the background. A value of 100% blocks all of the content behind the background. As you move the highlight to each setting, you can see a sample of the result in an adjacent panel.
- **Window color**—Choose from a list of colors for the window rectangle surrounding the entire caption. As you move the highlight to each color, you can see a sample of the result in an adjacent panel. Note that you won’t see any change unless you set the Window opacity to a value other than Default or Off.
- **Window opacity**—Choose from a list of opacity settings for the window rectangle surrounding the entire caption. This setting determines how much the area behind the caption window shows through the window. A value of 100% blocks all of the content behind the window. As you move the highlight to each setting, you can see a sample of the result in an adjacent panel.
Changing time settings

You can change time settings to suit your preferences. You can find the following settings by navigating from the Home screen menu to Settings > Time:

- **Sleep timer**—Set a time delay after which your TV will automatically shut off. This setting reflects the setting you can make in the Options menu from any TV input, as explained in Options menu settings on page 47. Note that the sleep timer setting is not input specific.

- **Time zone**—Select whether to set the time zone automatically or manually, and if set manually, select your current time zone. Typically, a TV connected to the Internet can discover its own time zone automatically, and a TV that is not connected to the Internet must be set manually. Initially, this setting is made when you set up the TV tuner, as explained in Setting up Antenna TV on page 40. Correct time zone information is needed to correctly display program data.

- **Clock format**—Select whether to display time in a 12-hour or 24-hour format, or to turn off time display. This setting is available only on TVs that are connected to the Internet. Non-connected TVs do not display time.

Scanning for broadcast TV channels again

There will be times when you need to create a new channel list. For example, you:

- Change cable providers
- Reorient your TV antenna
- Move to a different city with different channels

Whenever you need to update your TV channel list, you can repeat the channel scan.

**Tip**

Repeat the channel scan from time to time to make sure you are receiving all of the latest channels. Broadcasters add and remove channels, move channels to different parts of the spectrum, and change the power levels of their channels periodically.

To repeat the channel scan, from the Home screen menu, navigate to Settings > TV inputs > Antenna TV > Scan again for channels. Then select Start finding channels to begin the channel scan process. The screens and options that appear during this process are identical to those described in How do I set up the TV tuner? on page 40.

Using your TV in a home theater

Your TV has several features that make it an ideal TV for a home theater. But you might not notice them because they remain in the background until you decide to use them.

**Turning off TV speakers**

When you use your TV with a sound bar or an external amplifier and speakers, you’ll probably want to turn off the internal TV speakers.

To turn off your TV’s built-in speakers, in the Home screen menu, navigate to Settings > Audio > TV speakers and change the setting.

**Tip**

Your TV’s internal speakers can be enabled and disabled automatically as needed by system audio control, as described in Enabling system audio control on page 63. The internal speakers are also turned off when you use the headphone jack.

Changing the audio mode

Your TV has two audio modes, accessed by navigating in the Home screen menu to Settings > Audio > Audio mode:

- **Stereo**—Use this setting for internal speakers, headphones, and external stereo amplifiers connected through the HDMI1 (ARC), OPTICAL DIGITAL AUDIO OUT, or headphone jack.

- **Auto**—Use this setting to automatically detect the best audio setting based on the audio stream in the content you are watching. If you have connected your TV to an external Dolby Digital or Dolby Digital Plus compatible amplifier, receiver, or sound bar through HDMI1 (ARC) or OPTICAL DIGITAL AUDIO OUT, your TV automatically selects the appropriate surround sound capabilities of the device based on the characteristics of the current program.
Setting up a digital audio connection

You can connect your TV to an external amplifier, receiver, or sound bar by using either of these two connections:

- **HDMI ARC**—The HDMI Audio Return Channel enables your TV to output digital audio on one of its HDMI connectors. The connected amplifier can also function simultaneously as an input source to your TV, if needed. To use the ARC capability, you must connect an HDMI cable from your amplifier’s HDMI ARC connector to the **HDMI1 (ARC)** connector on your TV. You also must:
  - Be sure your HDMI cable is certified by HDMI.
  - Select the appropriate setting under **Settings > Audio > Audio mode**, as explained in Changing the audio mode on page 61.
  - Enable **HDMI ARC** under **Settings > System > CEC**, as explained in Enabling HDMI ARC on page 62.

- **OPTICAL DIGITAL AUDIO OUT**—Your TV has an **OPTICAL DIGITAL AUDIO OUT** connector that outputs a digital audio signal. To use the optical output, connect a digital optical audio cable from the amplifier to the **OPTICAL DIGITAL AUDIO OUT** connector on your TV. You also must:
  - Select the appropriate setting under **Settings > Audio > Audio mode**, as explained in Changing the audio mode on page 61.

**Note**

Dolby Digital Plus format is only output through the HDMI ARC connection.

After making the required HDMI ARC or digital optical audio connection, go to **Settings > Audio > S/PDIF and ARC** option and select the audio format to use.

**Note**

In most cases, Auto detect is the best option. Other settings can result in no sound when the content you are viewing does not contain the audio stream type you selected.

Controlling other devices through CEC

Consumer Electronics Control (CEC) enables your TV and other CEC-compatible home entertainment components to control one another in various ways. First, the CEC-compatible devices must “discover” one another and report their capabilities. After this, one device can control another according to the features you enable. For example, playing a disc on a Blu-ray player could switch your TV to the Blu-ray player’s input. Or, powering off your TV could also power off the Blu-ray player and the home theater receiver.

**Discovering connected CEC devices**

To discover CEC devices:

1. Make sure that your CEC-compatible components are connected to your TV with a suitable high-speed HDMI cable that supports HDMI ARC and CEC control.

2. Turn on each component and make sure all components have CEC enabled.

**Tip**

Some manufacturers have their own branded names for CEC functionality, so you might need to read the product documentation to correctly identify the CEC features of the device.

3. On your TV’s **Home** screen menu, navigate to **Settings > Control other devices (CEC) > Search for CEC devices**, and then press **OK** to start the discovery process.

When finished, your TV displays a list of CEC devices that are connected to each HDMI input, as well as any devices that had previously been connected. Your TV remembers the names of multiple CEC devices even when they are no longer connected. If the list is longer than the allowed space, press * to see a complete list in a scrollable window.

**Enabling HDMI ARC**

**HDMI1 (ARC)** is the audio return channel that is available on one of your TV’s HDMI ports. The audio return channel enables you to send a Dolby Digital audio signal back to a home theater receiver that is also sending an audio and video signal into your TV. Using HDMI ARC reduces the number of cables needed and optionally lets you control the volume and mute state of the receiver by enabling system audio control.

HDMI ARC is disabled by default. To enable HDMI ARC, in the **Home** screen menu, navigate to **Settings > Control other devices (CEC)**, and then highlight **HDMI ARC**. Press **OK** to check the adjacent check box.
Enabling system audio control
System audio control enables your TV remote control to change the volume and mute state of an amplifier or sound bar connected through HDMI, and to display the external device's volume and mute status in your TV's on-screen display. Your TV automatically turns off its internal speakers and sends volume and mute control signals to an external amplifier when all of the following are true:

- System audio control is enabled on your TV.
- A CEC-compatible amplifier is powered on and CEC discoverability is enabled.
- The CEC-compatible amplifier's HDMI ARC connector is connected to your TV's HDMI1 (ARC) connector with a suitable HDMI cable.

When the CEC-compatible amplifier is off, your TV automatically turns on its speakers (unless you have turned them off as described in Turning off TV speakers on page 61) and resumes local control of volume and mute state.

System audio control is disabled by default. To enable system audio control, in the Home screen menu, navigate to Settings > Control other devices (CEC) and highlight System audio control. Press OK to check the adjacent check box.

Enabling 1-touch play
1-touch play enables a component to control which TV input is active. For example, pressing Play on your Blu-ray player switches your TV to the Blu-ray input.

1-touch play is disabled by default. To enable 1-touch play, in the Home screen menu, navigate to Settings > Control other devices (CEC) and highlight 1-touch play. Press OK to check the adjacent check box.

Enabling system standby
The system standby feature causes other components to power off when you power off your TV. Depending on the CEC System Standby implementation, it also might enable connected components to power off your TV when you power off the component.

System standby is disabled by default. To enable system standby, in the Home screen menu, navigate to Settings > Control other devices (CEC) and highlight System standby. Press OK to check the adjacent check box.

Restarting your TV
You can restart your TV when necessary. Restarting has the same effect as unplugging your TV power and then plugging it in again.

To restart your TV, navigate to Settings > System > Power and then move right to System restart and then Restart. Press OK to confirm restart.

While your TV restarts, the screen goes dark for a few seconds, and then displays the startup screen for a few more seconds. When the restart operation is complete, you'll see the familiar Home screen.

Resetting your TV
You can choose to reset only your TV picture and audio settings to their original values, or perform a full factory reset to return your TV to the state it was in when you first unpacked and turned it on.

Reset TV settings
To reset only your TV picture and audio settings to their original values, navigate to Settings > System > Factory Reset, and then highlight Reset TV settings. Read the information on the screen to make sure you understand what the reset operation does.

To proceed with the reset operation, press PLAY/PAUSE three times in a row.

Factory reset everything
A full factory reset returns your TV to its original, out-of-the-box state. When finished, you must repeat Guided Setup, reconnecting to the Internet, re-linking your Roku account, and reloading any streaming channels. You also must repeat Antenna TV setup and input configuration.

Factory reset is the recommended choice if you want to transfer your TV to another owner, and is the only choice if you want to switch from store mode to home mode (if you inadvertently selected store mode during Guided Setup).

To perform a factory reset, navigate to Settings > System > Factory reset, and then highlight Factory reset everything. Read the information on the screen to make sure you understand what this reset operation does.

To proceed with the full factory reset, press PLAY/PAUSE three times in a row.
What if I can’t access the Factory Reset option?

It is possible that your TV might get into a state where you cannot access the various menus, including the menu option that lets you perform a factory reset operation. If that happens, you can force your TV to reset by following these steps:

1. Using a straightened paper clip or ball-point pen, press and hold the recessed **RESET** button on your TV connector panel.

2. Continue to hold the **RESET** button for approximately 15 seconds.
   During this time, the status light turns off, and then turns on bright, and then pulses. When the reset cycle completes, the light either comes on dim (if your TV power was off when you started) or your TV screen comes on and the light turns off (if your TV power was on when you started).

3. When the status light turns on steady dim or your TV screen comes on, release the **RESET** button.

4. Proceed through Guided Setup. See Setting up your TV on page 32.

Getting system updates

If your TV is connected to the Internet and linked with a Roku account, it will automatically get updates from time to time. You don’t need to do anything. But if you are aware that an update is available and you don’t want to wait until your TV updates itself, you can manually check for updates.

If your TV is not connected to the Internet, you can still get updates by using a USB flash drive.

You can download an updated *User Guide* that matches your LG TV powered by Roku TV software version from the LG web site at:

www.lg.com/us

To determine your current LG TV powered by Roku TV software version, go to **Settings > System > About** after you complete Guided Setup.

Checking for updates on a connected TV

If you’re one of those people who has to have the latest, most up-to-date gadgets the moment they are available, you can check for updates as often as you want.

If you’re connected to the Internet, you can check for updates using a **System update**. Navigate to **Settings > System > System update**, and then select **Check now**. Your TV responds either with a message saying that your TV is up to date, or with a message saying that an update is available.

Follow the instructions on the screen to install the system update.

Getting updates on a non-connected TV

If your TV is not connected to the Internet, you can still get system updates by using a USB flash drive and a computer with an Internet connection.

To get a system update, navigate to **Settings > System > System update**:

The **System update** screen on a non-connected TV gives you the opportunity to connect your TV to the Internet to automatically receive updates. We recommend this option if it is possible in your situation. To proceed, select **Connect to the Internet** and follow the instructions in But what if I didn’t connect my TV? on page 39.
Otherwise, if you can’t connect to the Internet, select I can’t connect, and then follow the instructions on the screen.

Here’s a summary:

1. On an Internet-connected computer, go to the website displayed on the System update screen.
2. On the USB Update web page, select the correct LG TV powered by Roku TV model and then click Download. Save the file to the root folder of a standard USB flash drive.
3. When the download finishes, take the USB flash drive to your TV and plug it into the USB port. When you do, your TV validates the files on the flash drive and displays a 12-digit code.
4. Write down the code and the web address, and take this information back to your Internet-connected computer.
5. On the 12-digit code page, enter the code your TV displayed, and then click Next.
6. On the 6-digit code page, write down the 6-digit code that appears, and then take it back to your TV.
7. Using your TV remote control, select Next to move to the next screen, and then use the on-screen keyboard to enter the 6-digit code. When finished, select OK. The system update begins. Do not remove the USB flash drive until your TV restarts.

When the update finishes, your TV restarts. You can check the new version number by navigating to Settings > System > About.

Other devices

Screen Mirroring your phone or tablet

Your TV has a feature called screen mirroring that lets you mirror your smartphone or tablet on your TV. Share videos, photos, web pages, and more from compatible devices. This screen mirroring feature is in a ‘beta’ period, which lets you try it out and allows Roku to learn what needs to be improved—so don’t be surprised if it doesn’t work perfectly. For information on which devices may work with Roku TV screen mirroring and instructions on how to use it, see http://support.roku.com/entries/56266670-How-do-I-enable-screen-mirroring-on-my-Roku-player

Getting and using the Roku mobile app

Roku makes the Roku mobile app free for compatible iOS, Android, and Microsoft Windows 8/8.1 devices. With the Roku mobile app, you can control your TV, find and add new Roku Channels, search and find something to watch, and even use your voice to search without typing. More information can be found by going to http://support.roku.com/home and searching for “mobile app.”

Using a universal remote

In many cases, you can program your cable or satellite universal remote control to also control your TV. You will need to have instructions for programming the remote control handy. Check with your cable or satellite provider for instructions. For details on how to set up your TV to work with universal remote controls, visit www.roku.com/universalremote.

Maintaining

- Do not use your TV in areas that are too hot or too cold, because the cabinet may warp or the screen may malfunction. Your TV works best in temperatures that are comfortable to you.
- Storage temperatures are 5° to 113°F (-15° to 45°C).
- Working temperatures are 41° to 95°F (5° to 35°C).
- Do not place your TV in direct sunlight or near a heat source.
Cleaning your TV cabinet
Clean the cabinet with a soft, lint-free cloth. If the cabinet is especially dirty, moisten a soft, lint-free cloth in a weak detergent solution, squeeze the excess moisture from the cloth, then wipe the cabinet with the cloth. Use a clean cloth to dry the cabinet.

Cleaning your TV screen
Clean the screen with a soft, lint-free cloth.

Troubleshooting

**Warning**
Do not try to repair your TV yourself. Contact authorized service personnel.

**Note**
If the problem is not solved by using these troubleshooting instructions, turn off your TV, then turn it on again.

**FAQ**
For the latest answers to Frequently Asked Questions, visit General Support & FAQs under the Support and Service section of the LG TV support website (www.lg.com/us) and the Support section of the Roku website (www.roku.com).

## General

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Possible cause</th>
<th>Try this...</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>No power</strong></td>
<td>Power cord may not be connected correctly</td>
<td>• Make sure that the power cord is correctly connected to both your TV power connector and power outlet. See Connecting power on page 29. You should see an LED in the front of your TV panel when a button on the remote is pressed. If you see no LED activity, try in another outlet or check your fuse box. • Unplug the power cord, wait 60 seconds, then plug the cord back in and turn on your TV.</td>
</tr>
<tr>
<td><strong>Other devices may be interfering</strong></td>
<td></td>
<td>• Other devices (for example, a surround sound receiver, external speakers, fans, or hair dryers) may be interfering with your TV. Try turning off one device at a time to determine which device is causing interference. After you have determined which device is causing interference, move it further from your TV to eliminate the interference.</td>
</tr>
<tr>
<td><strong>My TV tuner does not pick up as many over-the-air channels as it should</strong></td>
<td>Antenna may not be placed optimally</td>
<td>• Adjust the antenna location and rescan. See Scanning for broadcast TV channels again on page 61. Go to Settings&gt;Input. • Reception can vary by channel depending on the broadcast power level of a given station. Contact your cable or satellite TV provider. • Make sure that the antenna or cable/satellite TV is connected securely to your TV. • Try replacing the cable between the antenna/cable or cable/satellite box and your TV.</td>
</tr>
<tr>
<td><strong>Broadcast TV may not be set up</strong></td>
<td></td>
<td>• Make sure that Antenna TV is set up. See Setting up Antenna TV on page 40.</td>
</tr>
<tr>
<td><strong>One or more channels do not display</strong></td>
<td>Channels may be blocked or hidden</td>
<td>• Make sure that the channels are not blocked. See Blocking unrated programs on page 57. • Make sure that the channels are not hidden. The channel may have been deleted from the channel list. You can add the channel back to the channel list. See Edit broadcast TV channel lineup on page 52.</td>
</tr>
<tr>
<td></td>
<td>The wrong input may be selected</td>
<td>• Make sure that you have selected the correct input tile for the device or service you are trying to use. See Switching TV inputs on page 44.</td>
</tr>
<tr>
<td></td>
<td>You may need to use the remote control that came with the cable or satellite box</td>
<td>• If you are using a cable or satellite box, use the remote that came with that box to change channels.</td>
</tr>
<tr>
<td><strong>I lost my parental control PIN</strong></td>
<td>Need PIN recovery</td>
<td>• You will need to factory reset your TV, as the PIN cannot be recovered or reset any other way. See Factory reset everything on page 63. Go to Settings&gt;System&gt;Factory reset.</td>
</tr>
<tr>
<td><strong>Some settings cannot be accessed</strong></td>
<td>Not all settings are available for all devices or inputs</td>
<td>• If the icon or a menu option is grayed, you cannot adjust settings for the current video input mode.</td>
</tr>
<tr>
<td><strong>TV cabinet creaks</strong></td>
<td>This is normal</td>
<td>• When your TV is in use, the temperature rises naturally and may cause the cabinet to expand or contract which can cause a creaking noise. This is not a malfunction.</td>
</tr>
<tr>
<td><strong>Control buttons do not work</strong></td>
<td>TV may be frozen</td>
<td>• Unplug the power cord, wait a few seconds, then plug the cord back in and turn on your TV.</td>
</tr>
<tr>
<td><strong>TV keeps turning off</strong></td>
<td>Sleep time may be turned on</td>
<td>• Make sure that the sleep timer is not turned on. See the Sleep Timer option in Options menu settings on page 47 or Changing time settings on page 61.</td>
</tr>
</tbody>
</table>
### ROKU

<table>

Legal statement
Please note—your access and use of streaming content and channels via the LG TV powered by Roku TV are governed by the LG TV powered by Roku TV End User Agreement (see below). By using the LG TV powered by Roku TV you agree to the following disclaimer. For the avoidance of doubt, the content set forth herein shall refer to all content and channels accessible and available on the LG TV powered by Roku TV, including those available via the Roku* streaming platform, as well as broadcast cable. Due to the various capabilities of the LG TV powered by Roku TV, as well as limitations in the available content available therein, certain features, applications, and services may not be available or are not available on the LG TV powered by Roku TV, or in all territories. Some features on the LG TV powered by Roku TV may also require additional peripheral devices or membership fees that are sold separately. Please visit the LG or Roku, Inc. websites for more information on the LG TV powered by Roku TV and content availability. The services and availability of content on the LG TV powered by Roku TV are subject to change from time to time without prior notice.

All content and services accessible through the LG TV powered by Roku TV belong to third parties and are protected by copyright, patent, trademark and/or other intellectual property laws. Such content and services are provided solely for your personal noncommercial use. You may not use any content or services in a manner that has not been authorized by the content owner or service provider. Without limiting the foregoing, you may not modify, copy, republish, upload, post, transmit, translate, sell, create derivative works, exploit or distribute in any manner or medium any content or services displayed through the LG TV powered by Roku TV.

You expressly acknowledge and agree that your use of the LG TV powered by Roku TV is at your sole risk and that the entire risk as to satisfactory quality, performance and accuracy is with you. The LG TV powered by Roku TV and all third party content and services are provided “as is” without warranty of any kind, either express or implied. LG and Roku expressly disclaims all warranties and conditions with respect to the LG TV powered by Roku TV content and services, either express or implied, including but not limited to, warranties of merchantability, of satisfactory quality, fitness for a particular purpose, of accuracy, of quiet enjoyment, and non-infringement of third party rights. LG and Roku do not guarantee the accuracy, validity, timeliness, legality, or completeness of any content or service made available through the LG TV powered by Roku TV and does not warrant that the LG TV powered by Roku TV, content or services will meet your requirements, or that operation of the LG TV powered by Roku TV will be uninterrupted or error-free. Under no circumstances, including negligence, shall LG or Roku be liable, whether in contract or tort, for any direct, indirect, incidental, special or consequential damages, attorney fees, expenses, or any other damages arising out of, or in connection with, any information contained in, or as a result of the use of, the device, or any content or service accessed by you or any third party, even if advised of the possibility of such damages.

Third party services may be changed, suspended, removed, terminated or interrupted, or access may be disabled at any time, without notice, and LG and Roku makes no representation or warranty that any content or service will remain available for any period of time. Content and services are transmitted by third parties by means of networks and transmission facilities over which LG and Roku have no control. Without limiting the generality of this disclaimer, LG and Roku expressly disclaims any responsibility or liability for any change, interruption, disabling, removal of or suspension of any content or service made available through the LG TV powered by Roku TV. LG, Roku, the content providers, or the service providers may impose limits on the use of or access to certain services or content, in any case and without notice or liability. Any questions or requests for service relating to the content or services made available on the LG TV powered by Roku TV should be submitted to the respective cable content or service provider or as described in the LG TV powered by Roku TV User Guide.

In the event of a conflict between the LG TV powered by Roku TV End User Agreement and the terms set forth in this Legal Disclaimer, the LG TV powered by Roku TV End User Agreement shall prevail and control in all circumstances.

FCC Statement
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. this device may not cause harmful interference and
2. this device must accept any interference received, including interference that may cause undesired operation of the device.

Any changes or modifications in construction of this device which are not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

FCC Radio Frequency Interference
Requirements (for UNII devices)
High power radars are allocated as primary users of the 5.25 to 5.35 GHz and 5.65 and 5.85 GHz bands. These radar stations can cause interference with and/or damage this device. This device cannot be co-located with any other transmitter.

FCC RF Radiation Exposure Statement
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. This equipment should be installed and operated with minimum distance 20 cm (7.8 inches) between the antenna and your body. Users must follow the specific operating instructions for satisfying RF exposure compliance.

FCC DoC, Declaration of Conformity
Declaration of Conformity
Trade Name: LG
Models: 55LF5700 and 65LF5700
Responsible Party: LG Electronics Inc.
Address: 1000 Sylvan Ave. Englewood Cliffs, NJ 07632 U.S.A.
TEL: 201-266-2534

Warning
Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

Cables
Connections to this device must be made with shielded cables with metallic RF/EMI connector hoods to maintain compliance with FCC Rules and Regulations.

Macrovision statement
This product incorporates copyright protection technology that is protected by U.S. patents and other intellectual property rights. Use of this copyright protection technology must be authorized by Macrovision, and is intended for home and other limited viewing uses only unless otherwise authorized by Macrovision. Reverse engineering or disassembly is prohibited.
U.S. Patent Nos. 5,583,936; 6,836,549; 5,315,448; 6,381,747; 6,501,842; and 7,050,698.

One-year limited warranty — LG Televisions

Definitions:
LG ("Warrantor") warrants to you, the original purchaser of this new LG-branded television ("Product"), that the Product shall be free of defects in the original manufacturer of the material or workmanship for a period of one (1) year from the date of your purchase of the Product ("Warranty Period"). For this warranty to apply, your Product must be purchased in the United States from a LG authorized dealer of LG brand products only that are packaged with this warranty statement.

How long does the coverage last?
The Warranty Period lasts for 1 year (365 days) from the date you purchased the Product. Your purchase date is printed on the receipt you received with the Product.

What does this warranty cover?
During the Warranty Period, if the original manufacture of the material or workmanship of the Product is determined to be defective by an authorized Warrantor repair center or store personnel, Warrantor will (at its sole option): (1) repair the Product with new or rebuilt parts; or (2) replace the Product at no charge with new or rebuilt comparable products or parts. Products and parts replaced under this warranty become the property of Warrantor and are not returned to you. If service of Products or parts are required after the Warranty Period expires, you must pay all labor and parts charges. This warranty lasts as long as you own your LG Product during the Warranty Period. Warranty coverage terminates if you sell or otherwise transfer the Product.

How to obtain warranty service?
To obtain warranty service, call 800-547-1516. Call agents will attempt to diagnose and correct the issue by phone, or schedule service or repair as needed.

Where is the warranty valid?
This warranty is valid only in the United States to the original purchaser of the product.

What does the warranty not cover?
This warranty does not cover:
- Up to three (3) pixel failures (dots that are dark or incorrectly illuminated) grouped in an area smaller than one tenth (1/10) of the display size or up to five (5) pixel failures throughout the display. (Pixel based displays may contain a limited number of pixels that may not function normally.)
- Problems with delay in motion or action of video images while playing first-person style video games.
- Customer instruction/education
- Installation
- Set up adjustments
- Cosmetic damage
- Damage due to acts of God, such as power surges
- Accident(s)
- Misuse, unintentional or intentional
- Abuse, unintentional or intentional
- Negligence
- Commercial purposes/use, including but not limited to use in a place of business or in communal areas of a multiple dwelling condominium or apartment complex, or otherwise used in a place of other than a private home.
- Modification of any part of the Product, including the antenna
- Damage due to incorrect operation or maintenance
- Connection to an incorrect voltage or power supply
- Outages, static or other problems with over-the-air reception of the television broadcast signals.
- Attempted repair by any person not authorized by Warrantor to service the Product
- Products sold “as is” or “with all faults”
- Consumables, including but not limited to batteries (i.e. AA, AAA, C etc.)
- Products where the factory applied serial number has been altered or removed
- Loss or Theft of this product or any part of the product
- Failures or Damage caused by any contact including but not limited to liquids, gels or pastes.

REPAIR REPLACEMENT AS PROVIDED UNDER THIS WARRANTY IS YOUR EXCLUSIVE REMEDY FOR BREACH OF WARRANTY. WARRANTOR SHALL NOT BE LIABLE FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGES FOR THE BREACH OF ANY EXPRESS OR IMPLIED WARRANTY ON THIS PRODUCT, INCLUDING, BUT NOT LIMITED TO, LOSS DATA, LOSS OF USE OF YOUR PRODUCT, LOST BUSINESS OR LOST PROFITS. WARRANTOR MAKES NO OTHER EXPRESS WARRANTIES WITH RESPECT TO THE PRODUCT, ALL EXPRESS AND IMPLIED WARRANTIES FOR THE PRODUCT, INCLUDING, ARE LIMITED IN DURATION TO THE WARRANTY PERIOD SET FORTH ABOVE AND NO WARRANTIES, WHETHER EXPRESS OR IMPLIED, WILL APPLY AFTER THE WARRANTY PERIOD. SOME STATES, PROVINCES AND JURISDICTIONS DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU. THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY ALSO HAVE OTHER RIGHTS, WHICH VARY FROM STATE TO STATE OR PROVINCE TO PROVINCE.

How to obtain warranty service?
To obtain warranty service, call 800-547-1516. Call agents will attempt to diagnose and correct the issue by phone, or schedule service or repair as needed.

Where is the warranty valid?
This warranty is valid only in the United States to the original purchaser of the product.

What does the warranty not cover?
This warranty does not cover:
- Customer instruction/education
- Installation
- Set up adjustments
- Cosmetic damage
- Damage due to acts of God, such as power surges
- Accident(s)
- Misuse, unintentional or intentional
- Abuse, unintentional or intentional
- Negligence
- Commercial purposes/use, including but not limited to use in a place of business or in communal areas of a multiple dwelling condominium or apartment complex, or otherwise used in a place of other than a private home.
- Modification of any part of the Product, including the antenna
- Damage due to incorrect operation or maintenance
- Connection to an incorrect voltage or power supply
- Outages, static or other problems with over-the-air reception of the television broadcast signals.
- Attempted repair by any person not authorized by Warrantor to service the Product
- Products sold “as is” or “with all faults”
- Consumables, including but not limited to batteries (i.e. AA, AAA, C etc.)
- Products where the factory applied serial number has been altered or removed
- Loss or Theft of this product or any part of the product
- Failures or Damage caused by any contact including but not limited to liquids, gels or pastes.
California Proposition 65

**Warning:** This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. *Wash hands after handling.*
