## ULTRA LARGE 7.3 CU. FT. CAPACITY

### SENSOR DRY SYSTEM

- Electronic Control Panel with Dual LED Display
- Wrinkle Care Option
- SmartDiagnosis™
- 3-Minute Smart Installation Check
- FlowSense™ Duct Clogging Indicator
- LoDecibel™ Quiet Operation

### SUMMARY

- **Capacity**: 7.3 cu ft
- **Matching Washer**: WT7100CW
- **Sensor Dry**: Yes
- **Color**: White (W)

### APPEARANCE

- Intelligent Electronic Controls with LED Display: Yes
- Dial-A-Cycle™: Yes

### DRYER PROGRAMS

- **No. of Programs**: 8
- **Programs (Sensor Dry)**: Cotton/Normal, Perm Press/Casual, Heavy Duty, Bulky/Bedding, Delicates, Speed Dry (Manual Dry), Air Dry (Manual Dry), Freshen Up (Manual Dry)

### DRYER OPTIONS

- **No. of Options**: 7
- **Options**: Soak, Extra Rinse, Add Gar/Wrinkle Care, Control Lock, More Time, Less Time, Damp Dry Signal, Energy Saver, Default On/Off

### CONVENIENCE FEATURES

- **SmartDiagnosis™**: Yes
- **3 Minute Installation Check**: Yes
- **LoDecibel™ Quiet Operation**: Yes
- **End of Cycle Signal**: Yes
- **Reversible Door**: Yes
- **FlowSense™ Duct Clogging Indicator**: Yes
- **Wrinkle Care Option**: Yes
- **Child Lock**: Yes
- **Venting Option**: 4 Way Venting (Electric), 3 Way Venting (Gas)
- **4 Adjustable Legs**: Yes
- **Remaining Time Display/Status Indicator(s)**: Yes

### ENERGY

- **ENERGY STAR® Qualified**: Yes

### MATERIALS AND FINISHES

- Aluminized Alloy Steel Drum
- Tub Rear: Painted
- Cabinet: Painted Steel
- Door / Trim: Solid / White
- All Available Colors: White (W)

### POWER SOURCE

- **Ratings**: CSA Listed
- **Electrical Requirements / Type**: Electric: 240V 30 Amps
- **Gas**: 120V, 15 Amps
- **BTU**: 10,000 Feet

### OPTIONS

- LP Conversion Kit: 383EEL3002D
- Side Venting Kit: 383EEL9001B

### DIMENSIONS

- **Product (WxHxD)**: 27” x 44 1/4” x 28 15/16” (50 1/4” D with door open)
- **Carton (WxHxD)**: 29 1/2” x 48” x 31 1/4”
- **Weight (Product/Carton)**: Electric: 129.8 / 149.6 lbs., Gas: 131.2 lbs. (Electric), 143.5 lbs. (Gas)

### WARRANTY

- **Parts & Labor**: 1 Year

### UPC CODES

ENERGY / RATINGS

ENERGY STAR® Qualified | Yes |

Ratings | CSA Listed |

Electrical Requirements / Type | Electric: 240V 30 Amps |
| Gas: 120V, 15 Amps |

BTU | 10,000 Feet |

CONNECTING THE GAS SUPPLY

- Installation and service must be performed by a qualified installer, service agency, or the gas supplier.
- Use only a new stainless steel flexible connector and a new AGA-certified connector.
- A gas shutoff valve must be installed within 6 ft. (1.8 m) of the dryer.
- The dryer is configured for natural gas when shipped from the factory. Make sure that the dryer is equipped with the correct burner nozzle for the type of gas being used (natural gas or propane gas).
- If necessary, the correct nozzle (for the LP nozzle kit, order part number 383EEL3002D) should be installed by a qualified technician and the change should be noted on the dryer.
- All connections must be in accordance with local codes and regulations. Gas dryers MUST exhaust to the outdoors.

VENTING / DUCTWORK

- Ductwork is not provided with the dryer. You should obtain the necessary ductwork locally. The vent hood should have hinged dampers to prevent backdraft when the dryer is not in use.
- The total length of flexible metal duct must not exceed 8 ft. (2.4 m).
- Duct it 6 ft. (1.8 m) for each additional elbow. Do not use more than four 90° elbows.

CONNECTING ELECTRIC DRYERS

- A 4-wire connection is required for all mobile and manufactured home installations, as well as all new construction after January 1, 1996.
- A 3-wire connection is NOT permitted on new construction after January 1, 1996.
- A UL-listed strain relief is required.
- Use a 30-amp, 240-volt, 4-wire, UL-listed power cord with #10 AWG-minimum copper conductor and closed loop or forked terminals with upturned ends.

NOTE: Follow the guidelines below to maximize drying performance and reduce lint buildup and condensation in the ductwork. Ductwork and fittings are NOT included and must be purchased separately.
- Use 4-inch (10.2 cm) diameter rigid, semi-rigid or flexible metal ductwork.
- The exhaust duct run should be as short as possible.
- Use as few elbow joints as possible.
- The male end of each section of exhaust duct must point away from the dryer.
- Use duct tape on all duct joints.
- Insulate ductwork that runs through unheated areas in order to reduce condensation and lint buildup on duct surfaces.
- Incorrect or inadequate exhaust systems are not covered by the dryer warranty. Dryer failures or service required because of such exhaust systems will not be covered by the dryer warranty.

Correct Venting

Incorrect Venting

- Installation and service must be performed by a qualified installer, service agency, or the gas supplier.
- Use only a new stainless steel flexible connector and a new AGA-certified connector.
- A gas shutoff valve must be installed within 6 ft. (1.8 m) of the dryer.
- The dryer is configured for natural gas when shipped from the factory. Make sure that the dryer is equipped with the correct burner nozzle for the type of gas being used (natural gas or propane gas).
- If necessary, the correct nozzle (for the LP nozzle kit, order part number 383EEL3002D) should be installed by a qualified technician and the change should be noted on the dryer.
- All connections must be in accordance with local codes and regulations. Gas dryers MUST exhaust to the outdoors.
