

myTouch

CLEARLY POWERFUL. A DREAM TO USE.

I've wanted a smartphone for a while, and finally someone made the right one for me: T-Mobile® myTouch™ by LG has the speed and efficiency I need, but without all the complicated bells and whistles I don't. The Android™ 2.3 platform runs smoothly and just makes sense, especially with tips that walk me through key features. The simple setup had me checking Facebook® and sending emails right after I walked out of the store. And thanks to the Genius button, all my calls were safely routed to my voicemail on my drive home!

I don't need a ton of apps—I just need a few favorites that I can access quickly, and the App Drawer does that for me. Plus with access to TV on-demand, personalized music stations, and mobile magazines, I can get my entertainment on-the-go as easily as I can at home. Also, GPS offers turn-by-turn directions and real-time traffic, which are a couple of the most helpful things on a smartphone. Oh, and there's a quality camera, so I only have to carry one device with me! It really is the phone that's smart enough to make my life simpler.

Easy to Learn

Learning the intricacies and operations of a new device can be frustrating, but myTouch has you covered with the Setup Wizard and Tutorials and Tips. This device is easy to use – right out of the box.

Good Listener

When I'm driving, cooking, or otherwise occupied, the Genius button lets me easily operate key functions by voice command. Now, that's really the new definition of *genius*.

Organized Access

The App Drawer is ideal for organization—with its search capability and flexible structure, finding the perfect app is just a few taps away.

A Beautiful Sight

You've got a big 3.8" AMOLED screen in the palm of your hand delivering more vibrant colors, deeper contrast, increased brightness, and improved outdoor visibility.

Function and Fun

With a seriously big screen, powerful processor, and fast connection, entertainment is built right in with movies, TV, and radio on-the-go.
