

# Model : LG-US670

LG Electronics' strategic direction for greener products is to minimize the environmental load in every stage of the product lifecycle. Our process to improve environmental performance of our products is based on design for higher energy efficiency, reduction in raw materials use, improvements in recyclability and recycled content and in general, minimizing impact on human health and the environment.

The LG Electronics Environmental Declarations give information on the most relevant environmental aspects of the product.

## PRODUCT

Product Type/Model	Mobile phone / LG-US670
Weight	157.90 g (Including battery)
Dimension (W×H×D)	115.8 mm × 56.4 mm × 15.7 mm

## PACKAGE

Dimension (W×H×D)	155 mm × 114 mm × 56 mm
Volume	990 cm <sup>3</sup>
Weight	66.5 g
Material composition	Paper* : 66.5 g *Made from 76% post-consumer recycled paper.

## ENERGY CONSUMPTION

Non-Load Power Consumption	0.12 W
Average charging Efficiency	67.54 %
EU CoC <sup>1)</sup> Charger energy rating	★★★★

1) [http://re.jrc.ec.europa.eu/energyefficiency/html/standby\\_initiative.htm](http://re.jrc.ec.europa.eu/energyefficiency/html/standby_initiative.htm)

## Battery Information

Battery Type/Capacity	Standard Battery Type, Li-Ion/ 1500mA	
Weight	31.5 g	
Battery Using Time	Standby mode	Up to 20 Days
	Call mode	Up to 7 Hours

\* The battery cell does NOT contain lead, cadmium and mercury in accordance with EU Directives 2006/66/EC.

## RESTRICTED SUBSTANCES

In order to ensure that all LG Electronics' products and packaging comply with environmental regulations on the use of hazardous substances, LG Electronics manages our supply chain and material specifications for all materials used in LG products through implementation of LG standards for the management of hazardous substances in products and use of the LG hazardous substance management IT system.

- ☛ This product (including packaging) complies with the below mentioned directives and regulation.

### RoHS Directives

EU Directive 2002/95/EC

### REACH Regulation

EU Regulation 1907/2006/EC

### Packaging Directive

EU Directive 94/62/EC

### Ozone Depleting Substances

CFCs, Halons, Chlorofluorocarbons as banned in the Montreal Protocol

## VOLUNTARY REPLACEMENT of HAZARDOUS SUBSTANCES

LG Electronics either has phased out or is phasing out the using of polyvinylchloride(PVC), brominated flame retardants (BFR), chlorinated flame retardants (CFR) and phthalates as defined in LG Electronics' Standard for Management of Hazardous Substances.

>> Further information on the hazardous substance management of LG Electronics' and hazardous substance phase out program and regarding REACH compliance can be found at:

<http://www.lg.com/global/sustainability/environment/management-of-hazardous-substances.jsp>

## PACKAGING

- ☛ The product packaging does NOT contain :

Heavy metals according to EU Packaging Directive 94/62/EC

Ozone depleting substances as listed in the Montreal protocol

PVC

Unit Box is made from 76% of post consumer recycled paper. And it is printed with vegetable based ink (Soy). Plastic packaging material is marked in accordance with ISO 11469 and ISO 1043-1 to 4 or the relative regulation in Korea, Japan and China.

## DISASSEMBLY and RECYCLING

- Mechanical plastics parts heavier than 5g are labeled with material codes in accordance with ISO 11469 and ISO 1043-1~4 to facilitate plastic recycling.
- **Recycling in the EU** : LG Electronics has fulfilled the WEEE directive demands in all EU countries. The following are recycling firms to which LG Electronics has subscribed: [http://www.lge.com/about/sustainability/take-back\\_Europe.jsp](http://www.lge.com/about/sustainability/take-back_Europe.jsp)
- **Recycling in the US and Canada** : LG Electronics complies with electronic waste regulations in each state in the US and in provinces of Canada. In addition, LG Electronics has voluntary collection sites and holds periodic collection events in states without e-waste laws in place. LG Electronics is also a proud sponsor of Keep America Beautiful's Great American Cleanup. The following are recycling firms to which LG Electronics has subscribed: <http://www.lg.com/global/sustainability/environment/take-back-recycling/global-network-korea.jsp>
- **Recycling in other regions** : LG Electronics also operates take-back and recycling programs for unwanted products in countries where local take-back regulations do not exist. Customers are advised to contact the local LG service center for further information.

## INFORMATION for CUSTOMER

- This product provides the user guide printed with soy ink for reducing emissions of VOC(Volatile Organic Compounds) and reduction of metal pigments . To download a copy of US60 user guide, visit <http://www.lg.com/us/support/product/support-product.jsp>
- Always unplug the charger from the wall socket after the phone is fully charged; this avoids unnecessary power consumption of the charger in standby and saves energy.
- Electronic devices shall not be thrown into household waste but be separated for correct recycling.
- Batteries are collected separately for battery recycling. Do not throw used batteries into household waste.
- Please separate the packaging material according to responsible waste disposal options and sorting for recycling for environmentally sound recycling ; contact your local LGE service center or check local regulations for correct disposal of household electronics.
- See the Recycling collection point table on the LGE Webpage to find the nearest collection point for used mobile phone and accessories. <http://www.lg.com/global/sustainability/environment/take-back-recycling/mobile-phones.jsp>
- Further Environmental information is presented in LG Electronics' Sustainability Report (PDF form), available online at : <http://www.lg.com/global/sustainability/communications/sustainability-reports.jsp>
