

myTouch<sup>Q</sup>

# MESSAGING MADE EASY

I held off on buying a smartphone for a while, because I didn't want to pay a lot of money for a lot of crazy features that I didn't want to learn about or wouldn't use. But finally I found one that was right for me, the T-Mobile® myTouch™ Q by LG. It gives me the power and capability to do everything I want—text, email, update my status, get directions, and take pictures without investing a lot of time figuring it out. The setup was so simple that I was up and running the same day and with the Genius button, I was even able to safely make calls while driving home.

Lots of smartphones don't have REAL keyboards any more, but fortunately myTouch Q does! Having a real keyboard combined with tips that got me comfortable navigating through the UI immediately, sure made this phone a good choice. Even better, it has a categorized App Drawer for just the apps I need most, and preloaded entertainment access so when I have a few minutes for TV or news, they're right there. Oh, and of course with GPS real-time traffic and spoken turn-by-turn directions—no more getting lost! I finally have phone that made my life easier right away.

## Easy to Learn

Powered by the Android™ platform and touting a physical QWERTY keyboard, the myTouch Q is a texter's dream... simple, smart, and easy to use.

## Good Listener

When driving, cooking, or otherwise occupied, the Genius button lets users easily operate key functions by voice command.

## Organized Access

The App Drawer is made to contain all the personalized essentials for everyday life. That means no more sorting and searching—what's needed is right at your fingertips.

## Ingenious Innovation

With its ample screen, powerful processor, and fast connection, movies and TV are truly enjoyable without any lag or buffering.

## More Buttons

Reminiscent of the days when texting was simple, the myTouch Q channels ease-of-use with its full, slide-out QWERTY keyboard.
