

Immerse yourself in the LG 360 VR

Virtual Reality has never been so portable—or easy to set up! Just follow these simple steps.

SETUP ON YOUR LG G5

- 1 Locate and open the LG Friends Manager app that comes preinstalled on your LG G5**.
- 2 Connect the USB cable of the LG 360 VR to the USB port on your phone.
- 3 Once detected, the 360 VR will display under **My devices** tab on the LG Friends Manager app.
- 4 Tap the **download icon** next to the 360 VR and accept all prompts.**

- 5 On the Download apps screen, tap **DOWNLOAD** and wait for the apps to download and install. (May need to download each app individually.)
- 6 Tap **NEXT**.
- 7 Tap **DONE**.
- 8 When the 360 VR Manager app opens, tap **ACCEPT**. You can choose to download 3rd Party apps or press **CANCEL** to continue.

* If the LG Friends Manager does not come preinstalled, connect the LG 360 VR to your phone. The Google Play™ Store will launch and display the LG 360 VR Manager app. If the Google Play Store does not launch, please access manually and search for the LG 360 VR Manager.

** An active data connection is required to download.

FIT YOUR LG 360 VR

1 Remove the lens caps from the 360 VR lenses.

2 Turn the LG G5 on and connect the **360 VR USB cable** to your phone.

3 Remove the light blocker and put on the 360 VR. A safety notification will appear – use it as a visual reference to adjust the lenses.

4 Alter the position of the lenses for comfort by moving them left or right to fit your face.

5 Adjust focus manually by rotating. (360 VR provides optimal viewing and is intended for use without glasses, as the lenses will adjust according to your vision.)

6 Once adjustments are made, re-attach the light blocker and read the safety notification. Then press **OK** on the 360 VR or tap the phone screen.

7 For audio playback during your VR experience, you can either listen directly from the LG G5's speakers, or plug a wired headset into the LG G5 or LG 360 CAM.

Notes: You can only use one LG Friend at a time; the LG 360 VR must be connected directly into the G5's USB port; it will not work if plugged into the LG CAM Plus USB port. For first time use, it is recommended you walk through the device tutorial. If you **Skip** it, you can access again from 360 VR Home.

INCOMING CALLS & MESSAGES

While wearing the LG 360 VR, you will receive call and message notifications through an on-screen notification window!

Incoming Message	A message notification will reveal the caller and time.
Incoming Call	An incoming call notification will reveal the caller. Press OK on the 360 VR to answer the call. Note: Audio from the call will play over your LG G5 speaker, or via a wired headset plugged directly into the LG G5.*

*If a wired headset is connected directly to the LG 360 VR, you must unplug the headset in order to hear the audio from the call.
