

INTUITION™ by LG

See what you've been

missing

You live large—dreaming up big ideas, expanding your social sphere, or broadening your entertainment horizons—Intuition by LG was made for oversized lives.

Share client presentations over cappuccinos on its spacious 5" display. Sketch out your latest masterpiece, right on the screen. Stream your favorite show while working out at the gym. Relax and read the latest news with ease in vivid, true-to-life colors. Meet the whole team via a videoconference with the corporate office.

No matter how you use it, you'll make a big impression and get more out of every moment with a device that's designed to be as big as your life.

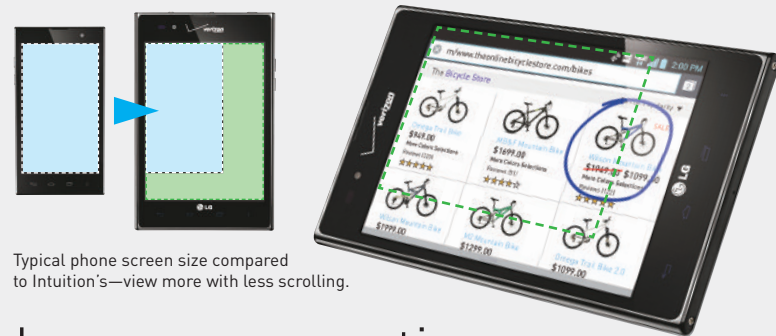

Actual Size

INTUITION™ by LG

## Less straining. More entertaining.

You've squinted at tiny screens and fumbled with bulky tablets for long enough. It's time for a big change—and Intuition by LG delivers. A cross between a tablet and a smart phone, it's big enough to deliver an incredible viewing experience, and small enough to fit in your pocket. With the ideal aspect ratio for viewing documents, you can comfortably read books, browse websites, and edit a presentation from your phone screen; flip through magazines, and shop online without having to scroll all the time. It's time to see what you've truly been missing.

Typical phone screen size compared to Intuition's—view more with less scrolling.

## Less exaggeration. More truth.

View design proofs in true-to-life hues on a spacious screen. Enjoy memorable video chats with the kids when you're traveling for work. Or enjoy reading at the beach, on a bright day. Intuition's 5" XGA IPS display lets you see your world bigger and brighter.

Larger screen size and ideal aspect ratio make reading more enjoyable.

## Less thumb-twiddling. More performance.

4G LTE

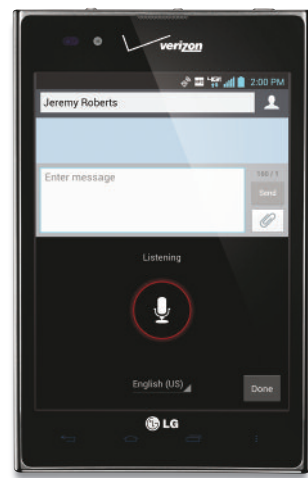

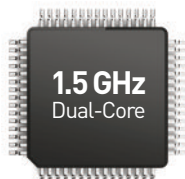

Get your downloads faster while listening to Internet radio in the back-ground. Send emails in a snap. Upload large files quickly. 4G LTE lets you accomplish more in less time—whether you're working hard, or hardly working.

From navigation to web browsing—all delivered in less time.

## Less waiting. More multitasking.

Stream TV shows while you're waiting for the next flight. Update your social network while downloading files for work. Send feedback without opening your laptop. You're big on multitasking—and Intuition will keep up with you with its powerful 1.5 GHz dual-core processor.

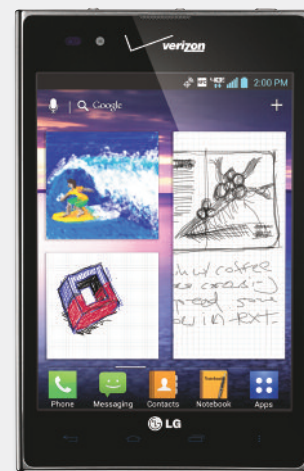

## Less frustration. More features.

Dictate messages without wasting time deleting errors. Organize tasks more efficiently. Clear notifications one at a time. And protect your phone from unwanted views with facial unlock technology. Built on the efficient and smooth Android™ 4.0 (Ice Cream Sandwich) operating system with LG exclusive upgrades, it has nuanced features designed to make a big difference in daily life.

## Less paper. More creating.

Jot down meeting notes directly on your device, with room to write (or doodle). Annotate financial reports using a Rubberdium™ pen. Send a customized map of the bike trail to your fellow weekend warriors. QuickMemo lets you take down ideas anywhere you are, right on your screen.

## Less forgetting. More freedom.

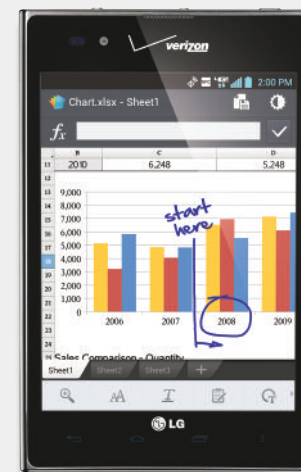

Have an idea you want to remember on your morning run? Just speak it into your phone, and let voice recognition do the rest. Get hit with inspiration during happy hour? Sketch logo ideas directly on your device instead of on your napkin. With Notebook, you can take your personal journal with you no matter where you are, and easily add sketches, notes, photos, and videos on the go.

## Less limitation. More ingenuity.

Edit Excel® spreadsheets, build PowerPoint® presentations, and review Word® documents anywhere with this unique Microsoft Office productivity app. Polaris® Office lets you stay ahead of the game, without getting stuck at the office.

**LG TAG+ (NFC)** - Whether you're home or working at the office, you can save different phone modes for different locations, and switch to those modes with a single tap.

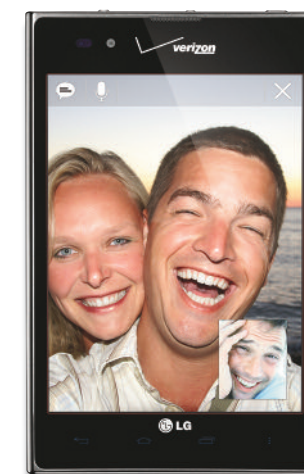

## Less to carry. More to remember.

Shoot high-definition video of your daughter's dance recital. Take impromptu nature shots with surprisingly sharp details. Capture super-crisp images when you play a round of golf with your buddies—and skip the bulky camera gear. Intuition's high quality 8 MP camera and camcorder with LED flash and HD video recording has all the imaging power you need, in one slim device.

## Less distance. More connections.

Video chat with friends in Austin or your office in San Francisco. See the big picture on a large display during a videoconference with partners in London. It's a wide world out there—and Intuition's 1.3 MP front-facing camera keeps you in touch with your business and personal life, in a large way.

**ANDROID BEAM (NFC)** - Do you have a photo or file to share from your phone? Send it to your friend's phone by physically tapping the devices together!
