

# Flip the Simple Switch

 **LG** | **EXALT™**

Picture a phone they don't have to work for, but that works just for them. One where the keys are large enough to push individually, where the content on-screen can be seen without squinting, and where every conversation can be heard the very first time. LG's Exalt is easy to use and even easier to love. It will read texts aloud, display content largely and clearly, and even provide bright LED information at a glance.

LG's Exalt is perfection in a flip phone. Its comfortable, light, and stylish design puts quality in ever pocket, while its easy to see, hear, and touch capabilities afford each user the comfort they deserve from a phone they can rely on. They can document their life and save memories for later to share with family and friends. This is the simplicity they need. This is life in big proportions.

#### Open up to the Possibilities

Largest available display on a basic flip phone currently in the market, at 3.0 inches.

#### Stylish Design

Easy to admire with large keys, including a dedicated Alarm Clock key.

#### Voice Clarity Mode

Improves sound quality and provides hearing assistance.

#### Reads Messages Aloud

Supports text to speech (text messages only), ideal for going hands-free.

#### Light up Your Life

Exterior LED Display matrix provides information such as voicemail, email, and text alerts at a glance.
